

Confirm

If you have done everything mentioned below, you are ready to write the code:

1. Python 2.7.11 installed and added to path Environmental variables
 2. Twilio package installed
 3. Twilio phone number, account SID, authorisation token obtained from Twilio website
 4. PyOWM package installed
 5. Key obtained from OpenWeatherMap website
- Go ahead and write the code then.

Python IDE

Python IDE comes with Python 2.7.11 installation and is used to write, test and debug Python programs.

You can run it directly from the installed applications by clicking on its logo. Or, write IDLE in Search

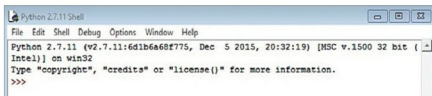

Fig. 18: Python IDLE (GUI) screen

tab on Windows Start page, click on IDLE (Python GUI) option. You will get Python shell screen as shown in Fig. 18.

Python is an interpreted language, so you can immediately start writing the commands followed by pressing Enter from the keyboard. Commands get executed when you press Enter.

Test by typing $2 + 2$ and then press Enter. You should get 4 as the answer in the next line.

Create new program

Enter Python IDLE → File → New File
Now you can start writing the

program in IDLE. I have provided the complete program in Text.py file (Fig. 19). I would recommend copying the code from this file, or use the file as it is, because Python is an indentation-sensitive language.

Note. You need to enter the information (Twilio phone number, account SID, authorisation token and key) in the code you have obtained in the previous steps.

Importing modules

Let us start with importing different modules that would be required in the program.

THE BEST CONNECTOR SYSTEMS FOR HOME APPLIANCES, AUTOMOTIVES AND HVAC

www.stocko-contact.com

STOCKO CONTACT GmbH. World's leading manufacturer of Crimp and Insulation Displacement Connector (IDC) systems. STOCKO CONTACT GmbH boasts of an in-house Machine Department with Hand Operated Tools, Semi Automatic as well as Fully Automatic Machines. STOCKO parts are widely used in Automobile, HVAC and Home Appliances Industry. In India and Sri Lanka, already 11 major projects running with Stocko parts.

Do visit us to explore the world of German made Crimp, IDC and Terminating Machines to provide you the best solution for your wire harness.

Applications

- Stoves
- Air Conditioners
- Washing Machine
- Lighting Systems
- Refrigerators
- HVAC Industry

- IDC Tools and Machines
- Insulation Displacement connectors
- Multiple connector systems in various pitches
- Crimp contacts in several material with different plating
