Make it super thin Make magic with plastics

Thinner. Lighter. How ambitious are you for your next phone, tablet or ultrabook? Now you can design parts and components as thin as 0.12mm, and they will be rigid and durable. High flow plastics from DSM, outperform every benchmark. We work with designers and engineers at the world's leading mobile brands to create the next generation devices. They challenge us to make their designs for frames, enclosures, antennas, connectors (e.g. audio jack, USB Type-C) and cables possible with plastic. We innovate advanced plastics and work with the component manufacturers to turn their design vision into reality. What's possible for your next device? Make it thinner. Stronger. Without harmful substances. Contact your local DSM expert and share your challenge.

All in One Solar LED Street Light

12W, 15W LED models

- Compact design with integrated Solar panel, LED light, motion sensor, Li-ion battery and Solar charge controller
- Completely Off-Grid design with very easy installation
- Microprocessor based design enables intelligent and efficient working
- Lithium ion battery technology provides long and maintenance free product life
- PIR Motion sensor adjusts LED brightness to extend light backup time
- Automatic Dusk-to-Dawn operation and Solar panel dirty indication LED
