Xiaomi launches air purifier

The smart way to breathe

Mi Air Purifier 2 is simple, elegant and has a new compact design that is 40 per cent smaller than the first Mi Air Purifier. Despite this, it offers a high 310m³/h clean air delivery rate and takes just ten minutes to circulate purified air in a 21m² room.

Inspired by aircraft engines, the aerodynamic pressure system created by Xiaomi's R&D team draws inwards from the base and expels air upwards with great force. Smartphone controls let you switch it on and off remotely, even when you are away from home. This way you can always be sure to come home to clean air.

Envent launches earphones

A perfect accessory for a versatile lifestyle

LiveFit 510 is attuned to the demands of a modern-day user and juggles different roles seamlessly. As a fitness partner, these are sturdily-built and sweat-proof. Flaunting an ergonomic design, these are ideal for low-to high-intensity workouts; be it jogging running or cycling. For music and movie aficionados, these uber-comfy audio earphones satiate the need for dynamic HD sound, delivering deep bass and clear treble.
