

Video door phone from Zebronic

Upgrade your home or office security to the next level

Zebronic has announced the launch of its new video door phone, ZEB-VD4 Smart, bundled with advanced security and surveillance features. It is an ideal solution for those looking to upgrade their home or office security to the next level. Ensuring the safety of your loved ones while you are at work or out for business, the new ZEB-VD4 Smart facilitates two-way communication and transfers live video feed to a clear LCD screen, giving you a crisp and clear view of the individual standing before your door, while its wide-angle camera assures that nothing stays hidden from your view. Equipped with advanced SOS Alarm function, this video phone guarantees maximum protection from stranger danger.

iPad keyboard case from Logitech

With Apple pencil holder and Smart Connector for iPad Pro 9.7 inch

CREATE iPad Pro keyboard case is the ultimate creativity and productivity toolkit. It holds everything together—your iPad Pro, Apple Pencil and a keyboard—in one snug package, so all your tools are in one place whenever you need them.

CREATE comes with the new generation of connectivity—Apple Smart Connector, which means you never need to charge your keyboard; it will source power directly from your iPad Pro. Smart Connector also means that Bluetooth pairing is a thing of the past. Just set iPad into a typing position; as soon as the two points of Smart Connector touch, you are ready to type.

Fitness wearable by Samsung

A fitness band you can run with while your phone stays at home

Gear Fit2 allows you to make the most out of every workout with a highly-accurate heart rate monitor. The built-in GPS tracks your running route, distance and speed in real time, with precision and dedication so you can go farther, better. The 3.86 cm (1.5-inch), curved, super-AMOLED display is large enough for you to quickly check your stats mid-workout, without ever missing a beat.

Technical features include Tizen operating system, Bluetooth v4.2, 802.11b/g/n 2.4GHz Wi-Fi, and GPS, GLONASS location technologies. It features an accelerometer, a barometer, gyro sensor and HR sensor, 200mAh standard battery, along with auto activity tracker (for running, walking, cycling, elliptical rowing machine or sleep) and social challenge tracker (for steps leaderboard or steps challenge).

GizMo ByTes

Aadhaar app to allow people lock, inbox information

This mobile app enables Aadhaar holders to download their Aadhaar details on mobile phones. The app carries residents' Aadhaar number and demographics data, namely, name, date of birth, gender, address and photograph on a mobile phone. It is compatible with most Android phones (3.0 to 5.0.1). The app may be downloaded through Google Play app store on mobile numbers registered in UIDAI's database.

Technology-enabled learning platform

iAugmentor is a technology-enabled learning platform, bringing together technology, human intervention and a whole gamut of learning activities under one roof with the intention of making learning more effective, intimate and accountable. This platform gives access to a personalised mentor to individuals who desire to learn to augment their skill sets. The assessment based learning tool is a personalised and adaptive medium that intuitively suggests a learning roadmap to you as per your learning tendencies, learning competencies and learning proclivities, while constantly tracking progress.

Google's AI-centric messaging app

Allo app combines the best of Google's predictive and search superpowers along with an all-new personal assistant feature. It offers a hint at the artificial intelligence (AI)-filled future Google envisions. Apart from regular features, Allo is home to Google Assistant, the new conversational assistant that Google plans to bring to more of its consumer products.

Yahoo launches Newsroom

Yahoo has unveiled its latest mobile news application, using both algorithms and user choices to deliver the most relevant updates with a social twist. Yahoo Newsroom, tailored for mobile devices powered by Android or Apple operating systems, is Yahoo's move to counter Facebook and other Internet giants as a key place for news updates. The application uses algorithms for delivering personalised news, and also enables you to adjust the content and offer your own views.
