

ARM® Computer on Modules: Low on power, high on performance!

Powered by: • NVIDIA® Tegra K1, Tegra 3, Tegra 2 • NXP® i.MX 6, i.MX 7 | Vybrid

Introducing the new members of our rugged embedded computer family

ARM-based Computer on Modules (COMs)

Colibri iMX7

- Based on NXP i.MX 7Solo and i.MX 7Dual
- Heterogeneous Asymmetric Multicore
- Low power consumption / high efficiency
- Advanced security features
- Ideal for IoT and Connected Industrial products

Apalis TK1

- Based on NVIDIA TK1
- Full CUDA® support
- Ultra-high performance
- Up to 2.2GHz frequency
- Ideal for Computer Vision and Machine Learning

Why Choose Toradex?

NEW
Low cost of ownership with 24 months warranty

Guaranteed 10+ years product availability

Free lifetime product maintenance

Local warehouses for reduced lead time
