TEST & MEASUREMENT

Analyser

The multifunction power and harmonics analyser has the following key features:

- Safety: CAT III 1000V/CAT IV 600V
- Standards: IEC61000-4-30 (2008) S class, En50160 (2007)
- Single-phase 2W/single-phase 3W/3-phase 3W/3-phase 4W
- Display: Run chart, bar chart, vector graphic, waveform, event list, readings

OTDR Module

Anritsu introduces a tri-wavelength OTDR module for its Network Master Pro MT1000A portable optical tester that provides a comprehensive test tool

to verify fibre lines in core, metro and mobile networks. The module supports high dynamic range at all wavelengths, including 1625nm, which allows MT1000A to conduct extra-sensitive tests to ensure the performance of high-bandwidth networks.

Hygro-thermometer clock

Extech 445702 hygro-thermometer clock combines three displays for

time, temperature and humidity. Features are:

- Max/min memory with reset for temperature and humidity
- Switchable °C or °F temperature display
- 12/24-hour clock with alarm function
- 10 per cent to 85 per cent humidity
- Temperature range of 14°F to 140°F or -10°C to 60°C
- Accuracy of $\pm 6\%$ RH; $\pm 1.8^\circ\text{F}$, $\pm 1^\circ\text{C}$

Digital multimeter

This intelligent electrical measuring instrument from Testo helps carry out daily measurement tasks easily, safely and efficiently. Testo 760 is the first digital multimeter with automatic detection of measurement parameters and selection via socket assignment.

Power guard

MECO power guard TRMS (PG09) is used to measure power/energy consumption of electrical appliances. It indicates TRMS values of ten parameters on five display pages with a large dual-row LCD display having a backlight and an annunciator.

The power guard is available in three ranges, namely, PG09 - 20A,

PG09 - 5A, PG09 - 1A. It measures TRMS values of V, A, PF, Hz, kW, kVA, kVAR, kWh, EUT, CO₂ (in kg).

COMPONENTS

Potentiometer

Uni-Automation has introduced a precision multi-turn potentiometer, model

UNIPOT NHP22. Key features of this product are reliability, high accuracy, long life, gold-plated terminals, bushing mount and RoHS-compliant, among others.

Microcontroller

Texas Instruments has announced a dual-band wireless microcontroller CC1350 supporting sub-1GHz and BLE connectivity on a single chip. It enables you to move from a three-chip solution to a tiny single chip, while reducing design complexity, saving power, cost and board space.

System-on-chip

Renesas Electronics Singapore has announced EC-1, a dedicated EtherCAT communication system-on-chip (SoC), an industrial Ethernet solution that will help boost production efficiency in factories. EC-1 is intended for use in slave devices such as sensors and actuators, and in I/O modules equipped with communication functions.
