Pioneer India unveils touchscreen car stereo

Powered by Android Auto, Apple CarPlay and AppRadio Mode

Pioneer India Electronics has launched touchscreen car stereo AVH-X8890BT that revolutionises the driver's smartphone experience by bringing both Android Auto (for Android phone users) and Apple CarPlay (for iPhone users) into a single car stereo. Android Auto and Apple CarPlay would allow you to access your phones from the stereo's touchscreen and use apps in a safe way while driving.

With Android Auto, you can access Google Maps, listen to smartphone's music, manage calls, listen and reply to messages and use WhatsApp. Whereas, with Apple CarPlay, you can access Apple Music, manage calls, messages and listen to audiobooks and podcasts. The interface of CarPlay and Android Auto is purpose-built for driving with simple voice commands to control the above features.

Samsung launches cord-free earbuds

No strings attached

Plug Gear IconX earbuds into each ear and you are ready to go. Gear IconX sit snug in your ears in the most comfortable way. And you can run, jump and carry on with your life. These are designed to stay put; mix and match the different-sized earbuds and wing-tips for the perfect fit.

Gear IconX earbuds have a highly-functional fitness tracker, which is smart enough to track your activities like walking or running, and give updates on speed, distance and duration to heart rate and calories burnt via a dedicated voice guide. With options like Bluetooth streaming and 4GB of internal memory that holds up to 1000 tracks, you will run out of breath before you run out of songs to power your workout.

It allows you to track it so you never lose it, monitor your heartbeat and keep your heart healthy, capture workout selfies just right with remote shutter to control the camera on your smartphone, send reminders and so much more.

GizMo ByTes

Video calling app from Google

Google has unveiled video-calling app called Duo that works across Android and iOS operating systems and provides end-to-end encryption. Duo users identify themselves via their phone numbers, and Google claims the calls will keep going when they switch between mobile networks and Wi-Fi connections. A feature called Knock Knock lets the call recipient see live video of the person who is calling, before he or she chooses to answer (or not).

Enterprise communication, collaboration app

Flock, a product from Directly, works on Web, Android and iOS. It serves as an enterprise communication and collaboration app. It is handy for real-time conversations with an easy-to-use interface. It takes all of your most-used apps and services at work, and allows you to integrate these into a single platform to make you more efficient with your organisational tasks.

Money-management tool for the youth

Slonkit is a smart money-management tool for youngsters. The mobile app is linked to a personalised reloadable VISA prepaid card and can be used by people who are ten years of age and older. They can use the card for online as well as offline purchases across all VISA-accepting merchants, making the process seamless and cashless with an integrated mobile-first approach. If lost, the card can instantly be blocked or suspended through Slonkit app. The app also enables parents to instantly credit their child's card with money as required.

OneView Calendar, a calendar app

OneView Calendar is a calendar app that does things differently. Instead of giving you a variety of ways to view your information, OneView has only one view. It is in chronological order and you open up the app to the current day. You can zoom in and out to get more details if you need it, and scroll up and down to navigate. It comes with some gesture controls and drag-and-drop functionality to create new events on your calendar.
