

The Best Tech From IFA 2016

EFY BUREAU

IFA is the world's leading trade show for consumer electronics and home appliances. The event takes place in Berlin at the beginning of September every year. This year, from September 2 to September 7, 2016, we saw more than 40 exhibitors from 15 countries presenting their latest smarthome products and services. The trade show was spread across 3000 square metres.

The various companies showcased different aspects of intelligent home automation, including lighting, room temperature and heating, to energy management, security systems, wireless transmission technologies, access management and integrated robots for different purposes such as vacuum cleaners, lawnmowers or window cleaners. Join us as we round up the best from this year's show.

All-in-one remote

The average household has four or more devices that require a remote control, with an average of 40 buttons on each remote. SPIN remote SDC-1 is the ultimate all-in-one solution to control your smart-devices and non-smart appliances regardless of the technology—whether infrared, Bluetooth, Wi-Fi or whatever comes next. It lets you combine every function you truly need into a single device, no bigger than the palm of your hand. SPIN remote comes with a free app for iOS and Android and is extremely simple to set up. It can learn from remotes you already have and control both existing infrared

SPIN remote activates on touch and lets you turn on multiple devices with a single gesture

equipment and new smart-devices. The remote can even save multiple device profiles, so you can take it with you when you move from one room to another.

Auto-recharge cleaning robot

A product of Guangdong BONA Robot Corp. Ltd, China, the auto-recharge cleaning robot with sweep mop function is a simple way of cleaning. It is ultra-thin (8.5mm) and comes with features like smart

The robot searches for its station and charges itself automatically when the power is low

front anti-collision system (with ten sets of sensors beneath the bumper), intelligent dust detection, four types of cleaning modes (auto cleaning, edge cleaning, spot cleaning and S-shape random cleaning), intelligent scheduling, swirl main brush and double-side brushes, auto recharge and so on.

Keyless laptop

Lenovo announced an exciting range of Yoga and Miix devices at the show, but the most interesting

The easy-to-use Halo keyboard shows up on demand

was Lenovo Yoga Book. This innovative laptop loses the keyboard, and instead offers what is called a Halo Keyboard. This revolutionary device not only learns your hand positioning and helps you correct mistakes when typing, but also supports the included stylus, allowing you to sketch or draw, too.

Water-softening washing machines

AEG's 9000 series washing machines maintain your clothes gently and smoothly. Their World Innovation AEG Soft Water Technology softens the water before the wash cycle, for effective cleaning performance at just 30 degrees. This
