

not only prevents the colours from fading, but also protects the fit and texture of clothing.

Besides this technology, these machines work on the proven AEG ÖkoMix technology, where the detergent and softener are completely mixed with water and activated

AEG's 9000 series water-softening washing machines

before these hit the drum on the laundry. This guarantees uniform distribution and immediate activation of the detergent.

Eco-friendly dishwasher with perfect drying

Bosch Home Appliances' Zeolite dishwasher is an energy-efficient appliance that uses zeolites, a crystalline granule that reduces energy consumption of a dishwasher by approximately 20 per cent. The dishwasher incorporates cutting-edge technology with features like faster heating-up, optimised filter technology, targeted water distribution and improved pump performance with Active Water technology that adds up to less water, less energy and more performance. The dishwasher also comes with a new unique rinse system that uses every drop of water to full effect.

Handmade headphones

Happy Plugs is the first Swedish company to design exclusive headphones in 18-carat solid gold.

A Swedish goldsmith in Old Town, Stockholm, makes the headphones by hand

A Swedish goldsmith in Old Town, Stockholm, makes the headphones by hand. Happy Plugs headphones in 18-carat solid gold are moulded into shape and 25 grams of gold is used for each pair of earphones.

3D smart LED TV with dual-view feature

This is an offering from Vestel Ticaret A.S., Turkey. Dual View Display is a 3D based technology where two video sources are displayed on one screen at the same time. Sound coming from one of the currently being watched sources is provided via the speakers of the TV. And, audio of the other source is provided via headphone output.

To take benefit of this feature, special 3D glasses are needed, which are also sold separately by Vestel retailers. Each glass is set to view only one source. Both images are displayed in full-screen mode, and a number of users can watch the same source at the same time using proper glasses. However, only contents from an HDMI source via

3D smart LED TV with dual view feature

HDMI input and analogue or digital broadcast source via antenna input are supported by Dual View Display technology. This feature is available if an HDMI device is connected and any analogue or digital channels are stored in the TV.

Wireless VR headset

You can now dive right into the world of virtual reality (VR) with the innovative, comfort-fit Vision, the first all-in-one VR system from Alcatel. Owing to its untethered design, it does not require a connection to a computer or mobile phone, allowing for complete freedom of movement and ultimate immersion.

It can be worn comfortably with glasses, with no adjustments, and can be put on and be ready to go in

The first all-in-one virtual reality system from Alcatel

just three seconds. Its comfortable fit eliminates pressure points and ensures a comfortable experience for three hours of continuous use, while low-latency 17ms response speed means you can say goodbye to dizziness. Video is crystal clear with a 90Hz refresh rate, and you can enjoy an enormous 120° field-of-view along with 360° audio, allowing you to truly plunge into the experience.

Smartball

miCoach smartball from Adidas has a built-in sensor that tells you everything you need to know about
