

Technology transfer of Static Voltage Stabilizer

Single phase up to 70KVA and three phase up to 200KVA

High correction speed, Tight Regulation, Fully Solid State

IGBT based PWM type buck-boost voltage stabilizer with tight regulation and fast correction speed impossible to obtain using servo voltage stabilizers, SCR / triac type stabilizer or relay type stabilizer.

- IGBT based PWM type Static Voltage Stabilizer with output regulation of $\pm 1\%$ impossible in conventional stabilizer
- Direct AC-AC conversion without rectifying to DC improves efficiency, reliability and reduces components
- Fully solid state. No moving part, hence more life and no maintenance
- Rapid cycle by cycle correction of output. It can correct sudden fluctuation in the line voltage
- No distortion in output waveform
- Automatic bypass in case of failure
- Small transformer size (1/5th of the capacity)
- Overload cutoff and short circuit cut off
- Over voltage and under voltage cutoff
- LCD display for displaying all parameters and your company name

Technical know how cost – Rs.11 lacs

Approx. BOM of a 10KVA single phase unit – Rs.10000

Approx. BOM of a 30KVA single phase unit – Rs.20000

Approx. BOM of a 30KVA three phase unit – Rs.30000
