

WORLD ROBOT OLYMPIAD

World Robot Olympiad™ is an event for science, technology and education which brings together the young people all over the world to develop their creativity and problem solving skills through challenging and educational robotics competitions. This year the theme is all about Waste Management.

Over 6 billion people live on planet earth today, producing approximately 1.9 billion tons of Domestic, Municipal, Industrial, Medical, Electronic, Radioactive, Toxic and Hazardous waste every year. 30% of the waste generated remains uncollected and rest 70% gets dumped in oceans, landfills and dumpsites thus polluting and clogging our ecosystem, causing numerous health and environmental hazards. We have to find ways to reduce, manage and recycle waste.

This year, World Robot Olympiad (WRO™) challenges you to design, build and program autonomous Robots to solve exciting challenges and come out with innovative solutions to **Reduce, Manage and Recycle Waste using Robotics Technology!**

Let's get together and Rap the Scrap!

CATEGORIES

- Elementary** (9-12 years)
- Junior High** (13-15 years)
- Senior High** (16-19 years)
- WRO Football** (10-19 years)
- Open Category** (9-25 years)
- Advanced Robotics Challenge** (17-25 years)

SCHEDULE

- Regional Tournaments**
21 August - 15 October 2016
- National Competition**
22-23 October 2016
- International Championship**
25-27 November 2016

For team registration, participation details and rules contact your nearest science center/science museum or log on to:
