

NEW

We measure it. **testo**

Uniquely Different...

Introducing NEW electrical measuring instruments from testo with outrageously unique features to complete your HVAC/R Kit.

testo 745

Non- contact voltage tester

- **Non contact voltage testing upto 1,000 V AC**
- Filter for high frequency interference signals
- Adjustable sensitivity
- Waterproof and dustproof according to IP 67
- Audio visual alarm for presence of live parts/ cable

testo 750

Current/ voltage tester

- **First voltage tester to measure current**
- Determines voltage upto 1000 V, current, resistance as well as continuity testing
- Automatic measurement parameter detection
- Single pole voltage testing
- Detection of direction of rotating magnetic field
- Certified according to DIN EN 61243-3:2010

testo 760

True RMS Digital multimeter

- **Automatic measurement parameter detection and selection via the socket assignment**
- Easy, modern operation with function keys instead of a rotary dial, large display
- Prevents incorrect settings
- Low pass filter- for accurate VFD output voltage measurements, frequency measurements
- μ A current measuring range available

testo 770

Voltage tester

- **With patented 360° all-round LED display for visibility from all sides**
- Voltage range from 12 to 690 V
- Ideal for voltage testing, continuity testing and rotating magnetic field
- Fibre-optic technology for optimum voltage indication
- RCCB trigger function for RCCB testing- Safety First
- Single pole voltage testing

testo 770

Clamp meter

- **Unique grab mechanism for easy and safe working at tight measuring points**
- Auto AC/DC for current and voltage
- True root mean square measurement- TRMS
- μ A current measurement
- Inrush current, power and p.f. measurement
- Bluetooth, connectivity with testo Smart Probe App
