

Key features are:

- High-reliability isolation performance
- Improved load response characteristics through adaptive on time control
- Optional evaluation board makes it easy to verify performance

AC/DC converters

Mornsun has released 3W three-phase four-wire AC/DC LS03-16BxxSS and LD03-16Bxx converter series, which meet UL60950/

EN60950/ FCC part 15 standards. The series offers 90V AC ~ 528V AC wide input range and meets requirements of 3 x 220V AC/380V AC nominal voltage and any two-wire connection from three-phase four-wire system.

These also provide efficiency up to 76 per cent, 4000V AC isolation and output short-circuit and over-current protections.

TVS diode array

SP7538P and SP0544T series TVS diodes offer these key benefits:

- Extremely low loading capacitance of 0.5pF (typ) per I/O reduces signal degradation and distortion for high-speed applications
- Low dynamic resistance (0.4Ω), which provides low clamping performance to ensure better protection for sensitive chipsets
- Enhanced ESD capability (± 12kV

contact, ± 25kV air) permits manufacturers to achieve ESD protection beyond the maximum level stated in the IEC standard

MISCELLANEOUS

Bluetooth audio products

Microchip Technology has announced the next generation of dual-mode Bluetooth audio products. The IS206X family builds on Microchip's successful IS202X portfolio of highly-integrated system-on-a-chip devices and modules by introducing Bluetooth Low Energy (BLE) capability.

LEDs

Kuality Photonics has introduced a product enhancement for 3030WZ80 150mA LEDs in 120/140 lumens with zener protection and a high CRI of 80. KLSL3030WZ80 CRI 80 150mA LEDs in 120/140 lumens deliver exceptional brightness thanks to the specially-designed lead frame profile that improves heat dissipation of the device.

Solar Wi-Fi data logger

Everon introduces India's first Wi-Fi enabled solar data logger for low-cost remote monitoring of your solar plant performance on your PC/mobile phone. Key features include:

- Works with external power source/ battery/self-powered through solar panels
- Built-in real-time clock, memory
- User-selectable /programmable real-time clock, updating frequency, Wi-Fi interface settings
- Can download data through local USB port
- Power consumption less than 0.2W
- Supports standard Wi-Fi network

Everon Energy Systems Pvt Ltd

VME-cPCI subrack

Key features of this product are:

- Prepared for installation of different slots, 3U or 6U x 160mm cPCI/VME boards
- For optional operation of drives and open frame or plug-in type PSUs
- Provision for rear I/O
- Duly wired
- EMC upgradable design

PCB prototype machine

With Nvis 72 PCB prototype machine you can escape the cumbersome task of traditional PCB fabrication, which involves time-taking etching and drilling processes. Provided with USB connectivity, Nvis 72 can print your desired circuit on the PCB within minutes. Accompanied design software provides a simple and user-friendly interface, and it can even be operated by novice engineers and students.
