

USEFUL WEBSITES

CIRCUIT AND PROJECT IDEAS

Constructing electronics projects and circuits has always been fascinating for hobbyists and budding engineers. This month we have for you a few websites that feature circuit and project ideas

Compiled by **NIRAJ SAHAY**

eeweb.com

Co-founders Joe Wolin and Cody Miller formed Aspen Labs LLC in 2007 with the goal of creating a business media company that focuses on the needs of engineers. In 2010, they partnered with Digi-Key Corp. and launched EEWeb, a premier electrical engineering community for hardware designers. Apart from several sections on the site, there is a dedicated section on electronic projects. This section has a good collection of projects for engineers.

www.eeweb.com/projects/

electronicsproject.org

The website has a good collection of electronics projects from basic to advanced level. It also has tutorials and circuit ideas. The site features simple alarm projects as well as advanced microprocessor and microcontroller based projects.

discovercircuits.com

The website was launched in 2002 and currently has 40,000+ electronic circuits or schematics carefully cross-referenced into 500+ categories. The site is a one-stop resource for engineers, hobbyists, inventors and consultants. It is a collection of information and offers quick solutions to electronic design problems. It is owned by David A. Johnson, P.E., who is an electronics engineer with over 30 years of practical experience in the areas of analogue and digital design, fibre optics and RFID.

electronicsforu.com

Electronicsforu.com is the digital avatar of *Electronics For You*. The magazine was launched in 1969, and is counted among the leading publications in the fields of electronics and technology, across the globe. *Electronics For You* is driven by the mission to enable its audience to benefit from the latest technology, be it an organisation, individual or a nation. The magazine is loved by a wide range of readers, who have one thing in common, a serious interest in technology. The website includes the hugely-popular EFY tested circuits and projects, reproduced from *Electronics For You*.

electronicshub.org

www.electronicshub.org/

This is essentially a blog for engineering students and provides quality information on various electronics project ideas, circuits, electronics tools and so on, from basic to advanced level. The site has project ideas divided into different categories, namely, Mini Projects, Free Circuits and Projects. You can find a wide variety of ideas on Arduino, embedded and solar.
