Smartwatch from Titan

One watch, many faces

Titan Juxt Pro smartwatch lets you stay on track with what matters most. You can do more on your watch with enhanced notifications—read text messages, answer or mute calls, scan your e-mails, get updates from social networking sites like Facebook and Twitter, and more. With Juxt Pro app, you can customise the alerts you want to receive. With just a tap on your wrist, you can enjoy your favourite music on your watch or sync it seamlessly with your phone. The built-in music app makes it easy to create playlists, store music, navigate different sound tracks and control volume.

The watch allows you to manage appointments in your calendar as you can sync your calendar, add, edit and delete events with ease and get reminders sent to your watch on time.

Wireless headphones by Bose

Free yourself from wires and connect easily to your devices

QuietComfort 35 wireless headphones from Bose comes with volume-optimised EQ that gives you balanced audio at any level, while a noise-rejecting dual-microphone system provides clear calls, even in windy and noisy environments. These provide up to 20 hours of wireless listening per charge, and 40 hours when wired. Premium materials make these lightweight and comfortable for all-day listening. Bose Connect app helps manage paired devices and gives you a personalised experience.

Gaming laptop from Asus

World's first liquid-cooled laptop

Asus has announced the launch of the world's first liquid cooled laptop—ROG GX700. The flagship laptop comes with a detachable ROG-exclusive Hydro Overclocking System cooling module and is powered by 6th-generation Intel Mobile K-SKU (Skylake) processor and NVIDIA

GeForce GTX 980 graphics card to give you desktop-grade power at home and ultra-fast performance on-the-go.

The Hydro Overclocking System not only provides unmatched cooling capabilities but also opens up the possibility of superior overclocking. The CPU can be overclocked up to 48 per cent and the 64GB DDR4 memory can be overclocked by up to 43 per cent.

GX700 is also the world's first 43.2cm (17-inch) real 4K UHD gaming laptop to feature NVIDIA G-SYNC for smooth, stunning visuals. It features a liquid-cooling dock based on a custom self-sealing valve design, a quiet and highly-reliable pump, and dual 92mm radiators capable of dissipating over 500W of heat. GX700 packs traditional cooling and can be run without the liquid-cooling dock.

Digisol launches Ethernet unmanaged Power over Ethernet switch

Ideal solution for small Ethernet workgroups and applications requiring PoE

Digisol has launched the eight-port fast Ethernet Power over Ethernet (PoE) unmanaged switch designed to enhance network performance in a compact form factor. DG-FS1008PH-A switch offers 8x10/100Mbps fast Ethernet ports with four PoE ports, which are IEEE 802.3af-compliant and can supply PoE power to PoE devices.

Existing Ethernet cables can be used to power up IEEE 802.3af-compliant network devices. This eliminates the need for an external power source and power cabling for such devices. The switch provides flexibility for connecting a PoE or non-PoE device. PoE devices
