Dual-motion speaker from Altec Lansing

Small size, big sound

IMW 140 is a lightweight, portable speaker that brings the party to you. The dual-motion speaker is wireless and Bluetooth-enabled, so that you can play music from your device or take calls with its inbuilt microphone. Its lithium-ion battery ensures a six-hour playback time. Despite its compact size, the speaker produces powerful sound. Additional features like onboard song navigation controls, a 10.1m (33-feet) Bluetooth range and the integrated carry strap allows you to roam around freely.

Power bank from Sony

High battery capacity for fast charging multiple devices at the same time

Sony has launched its new 15,000mAh and 20,000mAh power banks that can charge multiple devices at the same time, with fast-charging output. Using lithium-ion-polymer battery, it supports pass-through charging, allowing the devices connected to the charger as well as the charger itself to be charged at the same time.

Manufactured using Sony's Hybrid Gel technology, it commits to high quality and safety usage. The power banks can retain 90 per cent of their capacity even after 1000 charges.

GizMo ByTes

Educational app from Google

Expeditions, an educational app from Google, focuses on virtual reality and 360-degree video experiences and includes many locations that you can check out. It allows you to take part in tours of these environments or host your own tour. This is great for classroom environments and is even better if you have Google Cardboard handy.

Analytics portal from TRAI

Telecom Regulatory Authority of India (TRAI) has launched a new portal that allows mobile users to check the level of call drops, network coverage and call quality of telecom operators across the country. The said information would be available on analytics.trai.gov.in, and would give you the ability to navigate and view performance metrics from service areas to districts to cities and finally at BTS level.

AI-powered app for cleaning junk images

Sift Labs, an artificial intelligence (AI)-powered platform for curating digital images, has launched Sift Magic Cleaner app that will clean junk images and videos from leading messenger apps on smartphones. Once you launch the app on a smartphone, it will analyse the image gallery in seconds to find non-personal or forwarded images and videos. Once that is done, press a button and those images will be deleted from your phone. The app is available on both Android and iOS platforms.

Channels, the networking app

Channels lets you connect with Android users who share your taste in apps and games. It automatically scans your phones and adds you to the channel for every app and game you have installed. Each channel is like a little community based around the app or game. You can ask questions, share tips or just talk to the other users.
