

NATRIP CENTRES

Centres and locations	Facilities	Purpose and involvements
Global Automotive Research Centre (GARC), Chennai	• Infotronics Lab (centre of excellence) • Passive Safety Lab (centre of excellence) • EMC Lab (centre of excellence) • Powertrain Lab • Fatigue Lab • Certification Lab • Material Lab • Component Lab • Homologation Tracks	• In close proximity of the manufacturing facility of Indian and global automotive giants in Chennai
National Automotive Test Tracks (NATRAX), Indore	• Vehicle Dynamics Lab (center of excellence) • R&D Tracks (proving ground) • NVH (testing on tracks) • Fatigue (testing on tracks) • Powertrain Lab	• A ground setup on 16.75sqkm (4140 acres) land for comprehensive testing and evaluation of all types of vehicles • Located between NH-3 and N-59 and well connected with road. The facility will have all types of surfaces to test vehicles against varying terrains and stringency • Core of the facility is the 13.6km oval four-lane high-speed track designed for a neutral speed of 250kmph on curves • Large part of test load on this facility related to evaluation of automotive performance such as max speed, acceleration, brake, efficiency, noise, vibration, handling, stability, etc
National Center For Vehicle Research & Safety (NCVRS) Rae-Bareilly, Uttar Pradesh	• Powertrain Lab • Fatigue Lab • Driver Training Institute • Homologation Tracks • National Accident Data Analysis Centre (unique facility in India by NATRIP- ITI-Raibareilly)	• Planned to house a full-fledged homologation and performance test facility for agricultural tractors and off-road vehicles, develop capability for specialised vehicles' driver training
NIAIMT, Silchar	• Mechanics Training Institute (MTI) • Driving Training Institute (DTI) • Inspection Maintenance Station (IMS)	• Has two campuses: Dholcheria Campus (45km from Silchar airport, 11km from National Highway) and Jaffribond campus (18km from Silchar airport, beside East-west corridor) • Dholcheria campus spread over 65 acres of land and Jaffribond campus covers 20 acres • NIAIMT is a significant initiative by government of India under NATRIP for entire northeast area to implement modern infrastructure and facilities aiming to develop skills to handle the latest automobiles by providing training to the youth • This centre has also created infrastructure to test in-use vehicle by applying latest technologies, thus making roads safer
Vehicle Research & Development Establishment (VRDE)-DRDO, Ahmednagar	• Homologation centre of the country • A state-of-the-art electromagnetic compatibility (EMC) lab • Multi-friction braking test track (ABS testing)	• Leading DRDO lab and a recognised lab for NATRIP EMC and ABS facility
Automotive Research Association of India (ARAI), Pune	• Engine • Emission • Structural dynamics • NVH • Electronics • Fatigue • Simulation • Materials • Forging • Certification and standardisation	• A co-operative industrial research organisation formed by the Indian automotive industry, and affiliated to Ministry of Heavy Industries and Public Enterprises • Authorised by the government of India as a certification agency for automobiles and components, formulating standards and carry out sponsored research for automotive industries • Carries out more than 90 per cent of India's homologation activities presently • Close proximity to the leading auto manufacturers like Volkswagen, Mercedes, Bajaj, Mahindra, Navistar, TATA Motors, Force Motors, and many first and second-tier suppliers have established their facilities
International Centre for Automotive Technology (ICAT), Manesar	• Active and passive safety • Component evaluation and fatigue • Mechanical and electrical • Photometry testing • EMI/EMC • Materials • Noise-vibration harshness • Powertrain • Vehicle-emission test cell • Engine-emission test cell • Vehicle-evaluation facilities homologation test tracks	• Central and state-of-the-art facility in north India to provide high-end automotive design, test and validation services
