

using high-voltage integration process and hence offers greater reliability. The high-voltage on-chip startup circuitry allows the device to start reliably when the AC line voltage is applied to the lamp. Primary-side regulation maintains the constant LED current that is needed to ensure consistent light output without requiring the current-sensing components and opto-coupler used in conventional secondary-side regulation. Power and harmonics analyser

Meco instruments has introduced a clamp-on power and harmonics analyser (PHA-5850 A/B/C) that displays harmonics up to the 99th order, total

harmonic distortion and waveforms with peak value. It also displays power parameters and harmonics of each individual phase of current and voltage.

The analyser has an inbuilt memory of 512 kB for 17,000 records and optical isolated RS-232 USB interface with user-friendly software for easy download of the recorded data. It is available with clamp-on current

transformers (CT) having multiple ranges of 1/10/100A, 10/100/1000A or 300/3000A as per the application.

LIGHTING

PowerLED hand lamp

Binay Opto Electronics has launched an LED-based inspection hand lamp in the form of a linear design for more convenient operation, with body and grip in insulated rubberised construc-

tion. The Linear PowerLED hand lamp utilises a light source comprising multiple high-power white LEDs, and has a very low power consumption of 6-9 watts and long life of over 50,000 burning hours.

As the light source is non-incandescent in nature, the unit does not heat up even with prolonged use. The unit housing is tested to withstand a dielectric breakdown insulation test of 2 kV between the input terminal and body.

POWER SUPPLY

Pure sine-wave home UPS system

Su-Kam has introduced a home UPS called 'Shiny' that provides 100 per cent pure AC power equivalent to grid power. The sine-wave back-up power supply ensures that your household appliances are protected from damage and extends their life too.

The UPS is equipped with a switched-mode power supply based

charger having a high power factor that minimises the amount of AC power required to charge the batteries, thereby reducing power consumption.

The system has a slider switch that allows you to choose between UPS and wide UPS modes. In the UPS mode the input voltage window is 185-260V, while in the wide UPS mode the input voltage window is 105-275V.

STORAGE

External disk drive

ADATA Technology has introduced a high-speed external hard drive. The CH11 incorporates the recent Super-Speed USB 3.0 standard and achieves read speeds of up to 90 MB/s. Custom labels provide the user with a handy solution for labeling the drive contents.

The unit can be stored and used vertically, making it an excellent choice for those who frequently work with multiple external drives of different categories.

The drive weighs 186 gm with dimensions of 20x81.5x21 mm³. It's available in white, black and pink colours, in capacities of 500 GB, 750 GB and 1 TB. ADATA Technology (India) Pvt Ltd, Mumbai
