ASUS graphics card for gaming

ASUS has launched the GTX550 Ti DirectCU graphics card for exceptional gaming performance. The DirectCU technology offers the advantages of 20 per cent more cooling out of its direct GPU contact, all-copper cooling design, as well as 'super alloy' quality components for faster performance and longer lifespan.

Flash for Android

Flash Player 10.2 has finally been released for Android 2.2 and 2.3, marking the availability of Flash for Android 3.0.1 Honeycomb. However, Flash for Honeycomb is a Beta release. Flash 10.2 for Android features performance enhancements that improve one's experience on mobile. Adobe has been working closely with Google to ensure tight integration and optimisation between Flash Player 10.2 and the new OS and browser capabilities, making it work the way it does on a desktop.

NVIDIA's new GPU for PC gaming

The GeForce GTX 550 Ti is the latest in NVIDIA's Fermi line of consumer graphics processor units (GPUs). Like all NVIDIA 'DX11 Done Right' GPUs, it is claimed to deliver the world's fastest performance in its class for DX11 games. Compared with the closest competitive product, it is said to be up to 50 per cent faster in today's newest DX11 tessellated games, and 38 per cent faster in previous-generation DX9 and DX10 games.

Search your body with Google Body

You have explored much of the earth and are also exploring the sky with the Google Sky app. Now it's time to look inwards and know about your own body with Google Body app. Google Body is a detailed 3D model of the human body. You can peel back anatomical layers, zoom in, click to identify anatomy, or search for muscles, organs, bones and more. You can also share the scene you are viewing by copying and pasting the URL.
