

Next-generation network analyzers

R&S®ZNC / R&S®ZNB vector network analyzers

R&S®ZNC: two ports for passive components up to 3 GHz

R&S®ZNB: two or four ports for sophisticated components up to 8.5 GHz

Intuitive operation

- Large, high-resolution touchscreen
- Toolbar and soft panel for clear overview of control elements
- Measurement results in just three operating steps

High performance

- Short measurement times for high throughput
- Up to 140 dB dynamic range – for high-blocking filters
- High power-handling capability for amplifier measurements

Convincing practical features

- Long calibration intervals as a result of high long-term stability
- Small footprint, quiet operation, low power consumption
- Future-ready thanks to modular hardware
