

With this software, you can add more features such as loading complete text file and translate to another language.

Prerequisites

1. Download Google Translate application programming interface (API) for .NET from http://google-api-for-dotnet.googlecode.com/files/GoogleTranslateAPI_0.4_alpha.zip

2. Extract the downloaded ZIP archive to C:\ GoogleTranslateAPI_0.4_alpha (you can choose a different path).

Designing the application

Launch Microsoft Visual Studio 2005 from your desktop. Select File→New Project and do the following:

1. Select project type as 'Windows' under Visual Basic and template as 'Windows Application'

2. Enter name as 'Google Translator.'

3. Click 'Ok' to create the project.

4. By default you can see 'Form1' on the screen. In this form, change the following properties under 'Properties' window.

(i) Name=frmMain

(ii) FormBorderStyle=FixedSingle

(iii) MaximizeBox=False

(iv) MinimizeBox=False

(v) Size= 952, 657

(vi) StartPosition= CenterScreen

(vii) Text= Google Translator

5. Select Project→Add Reference, select Browse from the 'Add Reference' dialogue box and select C:\

GoogleTranslateAPI_0.4_alpha\bin\DotNet20

6. Select 'GoogleTranslateAPI.Net20.dll' and 'Newtonsoft.Json.Net20.dll' and click 'Ok.'

7. Add 'Language.vb' module under Project→Add Module option.

8. Now add the necessary controls to the form as shown in Fig. 1. The relevant VB codes—FormMain.vb and Language.vb—are listed at the end of this article.

9. Compile the codes and run the program.

You can enter the text under 'Enter words/Phrase here'. Say, you entered 'How are you?' Next select your favourite language under 'Translate to' text box from multiple language options by using the mouse. Suppose you select 'Hindi' as the option (Fig. 2). Now click on 'Translate->' button. The output of the translated language will be displayed under 'Output' window as shown in Fig. 2.

You can also add complete text file in RTF format followed by clicking 'LoadFile' button to translate to another language.

EFY note. The source code of this article is available on www.efymag.com website.
