

amount of investment is likely to be made by private sector complementing the NOFN infrastructure, while providing services to individual users," said Kapil Sibal, minister for communications and IT.

A special purpose vehicle (SPV) will assume the responsibility for execution of the project after approval of the scheme by the Cabinet. The SPV will be finally owned by the government/USOF. State-owned BSNL has been entrusted with the task of undertaking the preparatory activity for project execution and establishment of the SPV.

Agilent Technologies extends its leadership in aerospace and defense in India

Agilent Technologies launched seven new products and solutions at the 'Aerospace and Defense Symposium

(L to R) Mombasawala Mohmedsaed, India AEO manager, electronics measurement group-Agilent India and Arun Dogra, country manager and VP-sales, marketing & support, EMG-Agilent Technologies

2011.' The newly launched innovations from the company expand its expertise in strategic electronics test for aerospace and defense segment.

The newly launched products and solutions from Agilent Technologies include arbitrary waveform generator (M8190A), peak power analyser (8990B), vector signal analysis software (89600B), LTE-advanced signal generation analysis solutions, EMI receiver, microwave handheld spectrum analysers and millimeter-wave signal analyser.

"The symposium has great significance in today's times as India is put-

element14 offers Johanson Technology and Johanson Dielectrics products

element14 has added Johanson Technology and Johanson Dielectrics high frequency ceramic solutions to its inventory as part of its global franchise distribution agreement. element14 will offer a broad range of multi- and single-layer capacitors, RF inductors, LTCC-based chip antennas, baluns, balanced filters, bandpass filters, low-pass filters, couplers, and diplexers, as well as other products from Johanson Technology and Johanson Dielectrics.

Micromax partners with Nazara Technologies

Micromax has entered into an agreement with Nazara Technologies to embed try-and-buy versions of popular high-end game titles from leading publishers such as Electronic Arts (EA). Nazara is the exclusive partner for EA in India and will offer over 40 key titles from the EA catalogue to Micromax consumers. These include popular titles such as Need for Speed, Tetris, Monopoly, EA Cricket 11, Harry Potter, GI Joe and Medal of Honor among others.

Lumex and element14 enter alliance

Lumex and element14 have entered a strategic partnership to enhance LED and LCD product portfolios across Asia-Pacific. The partnership allows electronic design engineers in Asia-Pacific to acquire a comprehensive range of over 8000 Lumex optoelectronic components from element14's inventory of 130,000 products.

ting substantial investments in advancing their indigenous capabilities in the strategic areas of aerospace and defense, the sector which now has the attention of the large US and European aerospace giants and large Indian corporates alike," said Arun Dogra, country manager and VP-sales, marketing & support, EMG-Agilent Technologies.

Fujitsu India partners with Siemens Enterprise Communications

Underlining the growing convergence of IT and telecommunications, Fujitsu India and Siemens Enterprise Communications, India are partnering to provide Indian customers with unified IT and communications solution.

"In recognition of the increasing convergence between telecommunications and IT, Fujitsu India is partnering with Siemens Enterprise Communications to ensure that our Indian customers can benefit from the best of German-Japanese IT platforms and communication capabilities," said Mark Wilson, senior vice president,

Fujitsu Technology Solutions.

Schneider Electric forays into retail sector

Schneider Electric India has announced a national retail roll-out for its switches, sockets and distribution systems for home and small and medium business (SMB) market segments. The retail initiative kicks off with the launch of ZENcelo and Vivace range of switches and the NeoBreak distribution systems in a phased manner that begins with Maharashtra, followed by similar roll-outs in Kerala, Andhra Pradesh and Tamil Nadu over the next few months. The national roll-out will be complete by 2012.

This is Schneider Electric's first foray into the retail sector covering the home and SMB market segments. As part of the retail initiative, the company aims to appoint 4000 retail outlets by 2012.

The market size of switches and distribution boards in India, growing at approximately 16 per cent year-on-year basis, is currently pegged at Rs 24 billion, of which the home market size is considered to be Rs 14 billion while the enterprise market is pegged at approximately Rs 10 billion.
