

Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!

of the code memory for this program on PIC16F877A. The configuration byte is for high-speed (HS) crystal.

Refer the data sheet of PIC for configuration. Select HS option and enter that byte-value during programming. If you still face problem, use WinPIC800 software and its compatible programmer board. WinPIC800 software can be freely downloaded from the Internet.

Device Control With Voice Acknowledgment

We have constructed 'Cellphone-Based Device Control with Voice Acknowledgment' project published in June 2010 issue, but it is not working. We don't get output in microcontroller for controlling the relay. Please help.

Chethan K

Through e-mail

The author Azarudeen Anifa replies: Earlier we got replies from other readers that the project was working fine. I have checked my program and it is working fine. There might be some problem in your program or circuit.

Moving Message Display

I need LCD-based moving message display using 8051 microcontroller circuit for my project. Kindly help.

Debanjan Mitra

Facebook

EFY: We do not have the mentioned project right now but a similar project using AVR microcontroller may be published in a forthcoming issue.

ATmega16 Serial Burner

Can anyone help me with the circuit design of ATmega16 serial burner?

Sourajit Karmakar

Facebook

EFY: You may refer to 'AVR Programmer Using AVR910 Protocol' project published in June issue. You can program many ATmega series microcontrollers including ATmega16, ATmega32 and ATmega8515. You may contact Kits'n'Spares at info@kitsnspares to get the issue or the components.

ATmega16 Using C Language

Please suggest me a good book for programming ATmega16 using 'C' language.

Nishant Mittal

Facebook

Akhil P. Oommen replies: Get some basic skills in 'C' first. Then read some tutorials available on Internet. Download the ATmega16 datasheet and try to figure out every detail by yourself. Read and understand the codes posted by others. If you need further help in understanding something, join a forum like AVRfreaks and ask them. Never give up, we are here to support you.

RFID-Based Circuit

Could you help me to get an RFID-based circuit for automatic car parking system?

Bala Gobi

Facebook

EFY: RFID-based automatic parking system project is going to be published very soon in EFY. Visit www.kitsnspares.com website to get more details on the availability of the kit.

Programming in C

I know assembly language for programming microcontroller. I would like to know how to program it in 'C'. Please help.

Harith Anuradha

Facebook

EFY: You may refer to 'Microcontroller-Based Projects' book. The book covers both assembly and 'C' language.

ERRATA

The picture of Minmax's universal tester, MME-UT20 in June issue, on page 129, column 3, was wrongly printed. Kindly refer here for the correct picture.
