

Accelerate The Performance Of Your Design With the PIC32 Microcontroller

PIC³²

PIC[®] MCU to the power of 32

Are your growing applications demanding more performance?
PIC32 does more with less!

With market-leading performance of 1.56 DMIPS per Megahertz from the MIPS[®] M4K[®] Core, Microchip's PIC32 is the right choice when you need to get more done with fewer clock cycles.

While performance is important, we know that getting your design to market quickly, with the right feature set is what really counts. Microchip's proven peripheral libraries and MPLAB[®] Integrated Development Environment offer compatibility across 8-, 16- and 32-bit PIC[®] microcontroller families making migration easy and your time to market its shortest.

Find out more at www.microchip.com/pic32 or check out what's happening in the community at www.mypic32.com

GET STARTED IN 3 EASY STEPS

1. Purchase a PIC32 Ethernet Starter Kit
2. Download MPLAB[®] IDE
3. Order samples and start designing!
