Mobile money transfer rules simplify transaction

Transferring money will soon become an easy job with the new mobile money transfer rules of the RBI. The central bank has increased the scope of money transfer mechanism through the National Payments Corporation of India (NPCI) promoted interbank mobile payment service (IMPS).

"The IMPS has so far facilitated instant inter-bank funds transfer between the sender and the receiver using the mobile. Now, following the RBI's permission, the IMPS will also facilitate funds transfer from ATM to mobile and the Internet to mobile," said A.P. Hota, managing director and CEO, NPCI.

The process will involve four simple steps including keying the beneficiary's/payee's mobile number, a seven-digit mobile money identifier number, amount and mobile personal identification number. Both the remitter and the sender will get SMS confirmation once the transaction is put through. A maximum of Rs 50,000 can be sent through this process in a day.

Salora eyes Rs 1.5-billion revenue by 2014

Consumer electronics firm Salora International is giving its own branded products a push apart from planning to widen its portfolio within a year as it looks to make a turnaround. In the next three years, the company is targeting a revenue of Rs 1.5 billion from the consumer electronics segment.

"We are widening our product range by getting into new categories like home appliances. Our brand visibility will increase as we focus on enhancing and localising our distribution channels," said M.K. Khanna, general manager (operation), Salora International. Khanna said that the company's business would grow by 20 to 25 per cent year-on-year. Last fiscal, the firm

1-Source Electronics launches blog

International electronic components distributor 1-Source Electronics has officially launched its blog and social media platform. The blog at www.1sourcecomponents.com/blog will enable 1-Source customers and other site visitors to collaborate with each other as well as with electronics engineers, semiconductor manufacturers and electronic component distributors to discuss ideas, ask and answer questions, solve problems, and share industry news and related business topics.

Infineon tops power semiconductors market

According to IMS Research, Infineon has strengthened its position in 2010 and commands an 11.2 per cent share of the overall power semiconductors market, ahead of Toshiba (6.8 per cent), STMicroelectronics (6.5 per cent) and Mitsubishi (6.5 per cent). The company holds an 8.6 per cent market share in discrete power semiconductors.

Emmvee completes hybrid project in Orissa

Emmvee Photovoltaic Power has installed a renewable hybrid energy unit in Bhubaneswar, Orissa. The unit—combination of solar and wind power—will boost the base transceiver station sites of BSNL. One interesting feature of the installed modules is the usage of structured glass. The so-called Albarino P catches more light and utilises a light trap, increasing the yield by at least three per cent.

Kerala to get digital seismographs

With the rise in the number of tremors in the state, the Kerala State Electricity Board (KSEB) has planned a Rs 85-million project to digitise seismograph machines. Out of the twelve seismograph centres in the state, the digitised equipment will be set up on a trial basis at six centres. At present, KSEB has analogue seismometers that were set up when the hydroelectric projects were launched.

PSUs team up for Rs 200-billion broadband network

BSNL has teamed up with MTNL and other public-sector units to undertake the Rs 200-billion project of building a nation-wide broadband network to take high-speed Internet to the hinterlands. The project will involve public-sector units like RailTel, GAIL and PowerGrid. Under the project, 1,10,000 kilometres of optic-fibre network will be laid to connect over 250,000 *panchayats* across the country.

had a turnover of Rs 850 million. The firm is also planning to increase the range of its existing products in the television segment.

Canon to triple business by 2015

Canon India plans to open 300 exclusive outlets and to triple its business to Rs 45 billion within four years. Many of the outlets would be in tier-3 and tier-4 cities.

"In the process, we will be increasing our exclusive retail brand stores from 95 by the end of this year to 300. Presently, if you live in these towns, you would have to go to a big city. Now we are going to our customers with exactly the same kind of exclusive retail outlet as you would find in a big

city," said Kensaku Konishi, president and CEO, Canon India.

The company already has 38 outlets in tier-2 and tier-3 cities. Canon products are available in 400 towns across 5000 outlets in India.

MMPL receives RBI's approval to issue mobile wallet

My Mobile Payments Ltd (MMPL), a Mumbai-based mobile payment service provider, has received the go-ahead from Reserve Bank of India (RBI) to launch financial services on mobile phones.

"We are elated that we have been granted the licence to offer the semi-closed m-wallet by the RBI. This means that by December, consumers can load their mobile phones with prepaid cash
