Want To Make Exciting Projects Yourself?

Worried about the quality of project, sourcing of components and technical support?

Kits'n'Spares
For the 'engineer' in you

Offer

RFID Projects

Secure Digital Access System Using iButton

₹ 2000/-

The main circuit of this kit is the access control system, which gets triggered when it detects a radio signal bearing pre-set codes. The iButton is an RF transmitting device which has an unique ID. When the iButton comes near the access control system, if the code matches, the control system allows access.

RFID Based Security System

₹ 5500/-

An RFID based access control system which triggers an electrical signal (can be used to open a gate) when it detects RFID tags in its vicinity. This kit also has the capability to store the number of times the RFID tag comes in the vicinity of the control system.

Major Projects

Micro-controller Based School Timer

₹ 1200/-

This versatile programmable school timer can be used to display real time clock as well as school bell timings on four 7-segment LED displays. It can store about 20 bell timings and activates the bell through a relay at every predetermined period.

Obstacle Avoiding Robot

₹ 3500/-

Robot kit based on an infrared sensor, which detects obstacles in its path. The robot can be programmed to be smart enough to avoid obstacles and take alternate paths.
