

“Convergence of telecom and security offers more flexibility to users”

GANESH JIVANI
MANAGING DIRECTOR
MATRIX COMSEC

Established in 1991, Matrix provides telecom and security solutions for businesses and enterprises. With around 30 per cent of its human resources dedicated to the development of new products, the company has launched cutting-edge products like IP-PBX, universal gateways, VoIP gateways and terminals, GSM gateways, access controls, time-attendance systems and fire-alarm systems. Having global foot-prints in Asia, Europe, North America, South America and Africa through an extensive network of more than 500 channel partners, Matrix ensures that its products serve the needs of its customers faster.

Ganesh Jivani, managing director, Matrix Comsec, speaks to Uma Gupta of EFY about the state of electronic security systems and related R&D in India

How big is the electronic security systems market in India?

Looking at the opportunity that India holds in the security market, several players like importers, local manufacturers and MNCs have started their business in India. The electronics security industry, which is largely import-based, is fast expanding. It is estimated to be close to Rs 16.5 billion,

growing at a rate of an estimated 25 per cent per annum.

What trends are these systems witnessing in technology and adoption?

Broadly speaking, the technology in security products market is evolving faster. The early adopters get the advantage. For instance, technologies like palm vein readers,
