Dealers & Distributors Solicited

Hundreds of dealership opportunities await you at **Electronics For You Expo 2012.**

Electronics For You expo 2012
Innovative. Genuine. Manufacturer. Souvenir. 18 to 20 February 2012
Pragati Maidan, New Delhi

16 to 18 Feb 2012
Pragati Maidan, New Delhi

Book your tickets and hotels to ensure that you're there for this mega event.

An **EFY GROUP** EVENT

Consumer checklist

After purchase

Carefully read the guidelines manual and follow its recommendations for use, care, cleaning and maintenance. If you lose the user's manual, contact the manufacturer for another copy. You might save yourself a service call by doing these simple checks if your product fails to operate:

1. Is the cord plugged in?
2. Is the start control fully in the 'on' position?
3. Is there a reset button or some other device that will get the unit back in operation?
4. Are there any loose connections?
5. Is the electric outlet working? Check by trying another outlet.
6. Are all the fuses intact, and is the circuit breaker 'on'?

When in need of servicing or repairs

1. Do not try to repair the product yourself or take it to an unauthorised repair facility.

Doing so can void your warranty

2. Get referrals for reputable repair dealers from your family, friends or co-workers
3. Check to see that the dealer has a valid registration
4. Get a written estimate for any service or repair before the work is performed
5. Obtain at least two estimates
6. Find out whether a diagnosis fee will be charged if the item is not repaired

defects in workmanship or material that may impair the equipment's performance. No warranty is given to normal wear-and-tear items. Also, no warranty is given for damages caused by external wiring, improper connection to the power supply or line wiring, or for damages caused by spikes, power surges, brownouts, lightning, static electricity or radio waves. A company's aim should be to ensure that the customers are satisfied with their purchase. The company should give top-priority service not only to the warranty requests but even otherwise.

Electronic equipment distributors should honour warranty obligations or product recalls issued by the original equipment manufacturer if the products are returned for repair or replacement because of a defect or fault. During the warranty period, the cost of repair or replacement is not borne by the warranty claimant. The warranty is given before or at the time of sale of the equipment to the warranty claimant and it identifies the following:

1. The warrantor and any other party such as the wholesaler or retailer, who may receive the electronic equipment returned under warranty
2. The period for which the warranty is valid
3. What is covered by, or included

in, the warranty—parts and labour or hardware that was part of the electronic equipment sold

4. How the evidence of date of purchase will be shown

5. Any exclusions as to what will not be covered by the warranty.

Guidelines for consumers

Before buying a product, research well to find the best value for your money. Make sure that a written warranty is provided which offers reasonable protection. Find out how long the product is covered under the warranty, what parts and services are covered, and what your responsibilities are in order to maintain the warranty. Also ask who will repair the product, if required, during the warranty period.

Service contracts. Although a store salesperson may sell you a service contract, the contracts are often administered by third parties. Before buying, be sure to fully evaluate the costs and benefits of the service contract and read the fine print. Compare the coverage of what is provided by the product warranty. Also, know your rights to cancel the contract.

Proper registration. Each location of every business that repairs or accepts products for repair, or that sells or administers service contracts,
