

is required to be registered. Dealers must display the registration in their shops. Consumers can verify current registration or get a list of registered dealers in their area. Registrations are renewed annually. Each subcontractor who performs repairs or installations must also be registered.

Repairs. The failure of any electronic device after some period cannot be ruled out. Even state-of-the-art equipment and appliances may eventually need repairs.

The first-stage failure of an electronic device or gadget is referred to as the burn-in period or infant mortality stage. It is characterised by failures due to manufacturing defects.

The second-stage failure is the useful life stage and is characterised by random but frequent failures.

The third-stage failure is termed the wear-out period. It is characterised by unsatisfactory working due to equipment aging and deterioration.

Because most electronic equipment nowadays are largely made up of semiconductor devices that have no real short-term wear-out mechanism, third-stage failure (except obsolescence) is rare for most electronic systems.

If adjustments or repairs are required, the purchaser may contact the customer service department with information including model, serial number and a copy of the original purchase.

Consumers should know what to expect when seeking repairs. The law requires service dealers to:

1. Inform the consumer in writing when a diagnosis fee will be charged and the amount of the charge
2. Provide a written estimate of the total repair cost to the consumer
3. Furnish an itemised repair invoice of all the labour cost and the parts installed when the repair is complete
4. Return all replaced parts to the

consumer (except those exempted by regulation)

5. Perform all repairs competently

The Electronic and Appliance Repair Dealer Registration Law prohibits:

1. False or misleading advertising
2. Fraud or dishonest dealing
3. False promises likely to induce the consumer to authorise repairs
4. Willful departure from accepted trade standards
5. Negligence or incompetence in repairs

If your product develops a problem, try to work it out with the dealer or service technician. If you can't resolve it locally, or if it is a warranty problem, write or call the manufacturer and detail your problem. If you feel the repair dealer has failed to meet professional standards, you can file a complaint with the consumer court. ●

CERMET RESISTRONICS PVT. LTD.

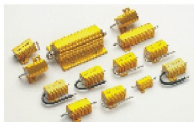

www.resistorcermet.com

Manufacturing widest range of Resistors in India

Exports to Germany, New Zealand, Russia, China, Middle East, Brazil and long new horizons...

Metal Film
Carbon Film
Metal Oxide Film
Metal Glaze
Fusible Film
Unlacquered
Fusible WWR

Networks
Dividers
Current Sense
Shunts
Zero Ohm
Tape Jumpers
Custom Built

RoHS
Compliant
Customer Approved

ISO
9001
Certified
Toll-free Approved

Breaking Resistors

Lead Banks

Auto Applications

High Voltage

CERMET RESISTRONICS PVT. LTD. Factory & Office Address: Gat No. 61, Plot No. 31 & 32, Shreevastu Taluka Bhor, Dist. Pune - 412 205, INDIA.
