

FLIPPING PAGES WITH E-BOOK READER

If you have a passion for reading, you can carry your library around with a portable e-book reader

around. On the other hand, portable e-book readers let you carry an entire library around—just download the books from your laptop or the Internet. Also, when you make any notes in paper books, even the graphite imprints may leave a non-erasable mark.

The debate between paper books and e-books is never-ending. For book-lovers, the library room is undoubtedly the most peaceful corner in their house. But let's discuss here the obvious advantages of e-book readers that are making these a hit. First, let's explain some technical terms:

E-paper. E-book readers employ e-paper

However, for many, the 'classic' paper books are still the preferred choice, reasons being that these don't cause significant eye-strain and are cheaper than e-book readers. Also, paper books are better for large-format textbooks and picture/photo books, don't need power to function and can be read anywhere in sufficient light.

But there are several drawbacks of paper books as well. These are bulky. If you plan to go on a long vacation, it is inconvenient to carry three-four books

(sometimes called radio paper or just electronic paper), which is a portable and reusable storage and display medium. It looks like paper but can be repeatedly written on—by electronic means—millions of times. E-paper display is different from LCD and LED as it utilises ultra-low-powered micro-capsules to display words. Unlike conventional backlit flat-panel displays, e-paper displays reflect light like ordinary paper.
