also be disabled from 'Options' setting of the software.

If there is no theft alarm alert even after the power cord or USB flash drive is removed, it could be due to a

delayed or disabled alarm time setting. Refer 'Help' menu to check this problem.

The alarm sound (except theft alarm) is subject to the system's speaker volume settings. If the volume level is set to maximum level, the alarm sound will also be high. If the speaker volume is muted, there will be no alarm sound. However, the theft alarm setting will always be loud regardless of the volume level or mute state.

Theft response. With the theft response feature, the laptop can be set to take certain actions or run a specific application without the user's intervention in case of theft. The path

of this application can be specified in 'Theft Response' setting. The application continues to run when a login account is locked out, so an unauthorised person cannot use the laptop. The theft response alert is also sent to you via an e-mail or SMS if you enable the alert feature.

In order to use the perimeter alarm and the inattention alarm, these need to be enabled and the safe zone defined by entering the home IP address in the settings.

The battery longevity alarm is designed for lithium-ion (Li-ion) battery, which is the most commonly used battery for laptops. When the battery level is down, the software triggers the alarm. The battery longevity alarm needs to be disabled if the laptop battery is not Li-ion type. ●
