

measurements at a reasonable price.

As a general-purpose low-frequency-to-RF network analyser that can be used for a variety of network measurements, the ENA series E5061B is said to deliver excellent RF performance and an accurate low-frequency measurement capability. The new options further extend the E5061B's functionality to enable faster, more efficient development, making it ideal for general R&D, education and manufacturing.

Solar power meter

Mangal Instrumentation has introduced a solar power meter that measures solar radiation. The solar power meter has a 3½-digit LCD with maximum reading of 2000, end-mount sensor, power and transmission options, and W/m² and BTU/(ft²·h) unit options.

The meter is useful in solar power research, physics and optical laboratories and identifying high-performance windows.

Ageing oven tester

Presto has introduced an ageing oven tester from Giant Force Instrument, Taiwan, that checks the ageing effects on rubber and automotive components. The tester incorporates a multifin, centrifugal-level vertical heat-exchange circulation system. Air-

change rate can be set according to the desired standard. Digital watt/hour meter and timer can be used to prevent the air-refresh rate.

The tester conforms to ASTM, JIS, UL, ISO, IEC and BS standards.

POWER SUPPLY

2500VA digital home UPS

Su-Kam has launched a 2500VA, 48V digital home UPS system (called 'Shark 2500') that can run all the IT hardware and major appliances used in homes and offices.

The Shark 2500 can power eight computers and one printer simultaneously. It provides instant switchover between mains and battery, and alerts users during emergency with a buzzer sound. The system is compatible with all types of

batteries and its fuzzy logic technology regulates battery charging, thereby improving the battery life. The auto-reset feature protects the system against overload and short-circuit.

The Shark 2500 is priced at Rs 14,000.
