Sparsh wins 'Leaders of Tomorrow Award' in electronics and electrical category

Samridhi Automations, popularly known as Sparsh, one of the fastest emerging security solutions brands, has won the prestigious *ET Now Indiamart Leaders of Tomorrow Award 2010* in electronics and electrical category. The award recognises Sparsh's continual journey towards innovation and aptitude of convergence with newer technology.

Emerging victorious out of the several nominations received for the category, Sanjeev Sehgal, managing director, Sparsh, was felicitated by Home Minister P. Chidambaram recently in New Delhi. Celebrating the outstanding achievements of entrepreneurs in the MSME space, the gala award ceremony witnessed the presence of distinguished personalities from the Indian business community and the MSME fraternity.

2010. By contrast, 3D TV sales are expected to rise 500 per cent, tablet computers 160 per cent, ebook readers 133 per cent and smartphones 26 per cent.

The annual survey focused on usage and spending on 19 different consumer electronics technologies among more than 8000 consumers in eight countries in both emerging markets and developed economies (Brazil, China, India, Russia, France, Germany, Japan and the United States).

Enterprises to buy over 10 million tablet PCs

"Although some commentators view tablets as underpowered media-consumption toys suitable only for consumers, in 2011, more than 25 per cent of all tablet computers will be bought by enterprises and that figure is likely to rise in 2012 and beyond," says consultancy firm Deloitte.

In 2011, firms are expected to purchase more than ten million tablet computers, with healthcare and retail sectors alone buying some five million tablets.

Mobile broadband subscriptions to hit one billion

During 2010, a significant milestone in terms of mobile broadband subscrip-

tions was reached as their number surpassed the half-a-billion mark globally. Ericsson estimates this number to double before 2011 ends.

The greatest number of subscriptions—around 400 million—is expected from the Asia Pacific region, followed by North America and Western Europe with more than 200 million subscriptions each.

Mobile broadband adoption has accelerated with strong growth of smartphones, connected laptops and tablets, supported by the introduction of high-performance networks. Smartphones users are increasingly using applications and Internet services on the go.

By 2015, Ericsson believes mobile broadband subscriptions will top 3.8 billion, with 95 per cent driven by HSPA, CDMA and LTE networks.

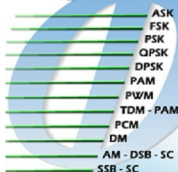

Number portability is here

After a long wait, mobile number portability (MNP) service has finally been launched across India. The facility was first introduced in Haryana last year, where at least 100,000 subscribers have availed the service.

The cost of porting a number to a new operator is Rs 19. But eyeing major gains in its subscriber base, Bharat
