

Why Relicell is the Right Battery for You

Part of a Rs.1000 crore IT industry group

Wide range to suit any application

VRLA Batteries - 12V 7AH to 250 AH

Tubular Batteries - 12V 40AH to 210 AH

Tested and certified by Central Power Research Institute, Bangalore (CPRI) and Electronic Test and Development Centre (STQC Directorate, Ministry of Information Technology, Govt. of India). **Download Test Certificates at**
www.relicellbattery.com

UL Certified

VRLA Batteries approved and registered in DGS&D for government purchases

47 Service Centres across India - Assured single window service support across India and countrywide installation support.

Home Solar Systems

The 'All About Home Solar Systems' article by P.S. Deodhar in January issue is beautiful, simple in style and easy to understand. It throws light on how to design home solar system practically. But what are the current controllers, inverters and batteries as well as solar panels available in the market today? Which companies are providing them? What are the prices involved? These points need to be covered in future issues of EFY, if possible with some practical examples.

Sachin D. Latkar
Chiplun, Maharashtra

Industrial Automation

The 'Industrial Automation' article published in EFY Oct. 2010 issue could have instead focused on the latest advancements such as distributed control system, programmable logic controller, SCADA, data acquisition system, telemetry, flexible manufacturing systems and robots, stepper motors and control, PID control, neuro-fuzzy control, transducers, sensors and interfacing, industrial computers and networking, electronic and electrical safety, 4-20mA current loop standard, power actuators and optic-fibre communication.

RFID-Based Security System

Where can I get the RFID tag and PCB for the 'RFID-Based Security System' project published in EFY Dec. 2010?

Murali
Through e-mail

EFY: The complete kit (including RFID tag and PCB) of this project is available with EFY associates Kits'n'Spares. For details, please visit www.kitsnspares.com or dial 011-26371661.

Buying Circuits Online

If I buy a circuit from 'Circuits On Sale' section of www.electronicsforu.com, how will I receive the circuit? Can I have it in PDF or any other

Projects invited

We invite ingenious and innovative electronic circuit ideas, DIY (do-it-yourself) and software projects for publication in EFY. Suitable honorarium will be paid for deserving contributions. You may send complete project details to the 'Editor, Electronics For You, D-87/1, Okhla Industrial Area Phase 1, New Delhi 110020.' For editorial guidelines, visit the link '<http://electronicsforu.com/electronicsforu/articles/WI-EDT.pdf>'

digital format?

Wilge Vargas
Through e-mail

EFY: You will receive the circuit in PDF format through e-mail after you have made the payment through credit card. You can pay through other options such as cheque and demand draft (DD) too by clicking 'pay by other means' option. In that case, you have to send the filled-in form to us along with the cheque or DD.

Vacuum Tubes

I am working on a tube amplifier which requires 12AX7 and EL84 vacuum tubes. Please give me the contact details of vacuum tube dealers.

Rachit Pradhan
Thane, Mumbai

EFY: You may visit www.eleb2b.com for relevant details.

Laptop Docking Station

In 'Smart Laptop Docking Station' circuit published in EFY Nov. 2010, I feel the series resistor (R6) of LED2 is wrongly connected to the base of transistor T1. Also, the circuit may not work during daytime because the photo-transistor inside the sensor will sense sunlight. The reflected sunlight is enough to saturate the photo-transistor.

Pradeep G.
Bengaluru

The author, T.K. Hareendran, replies:

Resistor R6 should be directly connected to pin 3 of IC2. Laptop docking stations are commonly used in office cabins and I think there is no chance of malfunction by direct or reflected sunlight. Further, the sensor element has a very short light-detection range.
