

# Embedded Prototyping. Simplified.

**Traditional Prototyping Tools**

**Graphical System Design Tools**

Get to market faster and reduce development costs with graphical system design, an approach that combines open, graphical software and off-the-shelf hardware to help you quickly iterate on designs and easily implement them on an NI embedded platform. The NI CompactRIO system offers an ideal embedded prototyping platform with a built-in microcontroller, RTOS, programmable FPGA, integrated signal conditioning, and modular I/O, as well as tight integration with intuitive NI LabVIEW software.
