

Key Component Distributors in India

A large number of component distributors, both local and multinational, have emerged in India which aim to provide the widest range of components at competitive prices. Let's take a look at some prominent names

■ UMA BANSAL

In the year 2009-10, India produced electronic components worth about Rs 133.60 billion—a growth of about 11 per cent. Demand from consumer electronics and mobile segments continued to grow. But given the huge electronics manufacturing services base

setting up in India, the domestic production of components is still insignificant. Manufacturers have no option but to import most of the components, which, in turn, adds to the cost of the end product.

The situation has, however, led to the emergence of a large number of component distributors, both local and multinational, which aim to provide the

widest range of components at competitive prices. Manufacturers, of course, stand to gain from this competition.

Let's take a look at prominent component distributors in India, listed alphabetically here. The information furnished here is based on the data provided by the companies themselves or taken from their websites.

Arrow Electronics India

A business unit of Arrow Electronics, Inc. (NYSE: ARW), Arrow Asia Pac is one of Asia-Pacific's leading electronic component distributors. In addition to its regional headquarters in Hong Kong, Arrow Asia Pac operates 54 sales offices, four primary distribution centres and 14 local warehousing facilities in 13 countries/territories across Asia. Providing a full range of semiconductors, passive, electromechanical and connector products from over 200 leading international and local suppliers, Arrow Asia Pac serves more than 10,000 original equipment and contract manufacturers and commercial customers in Asia-Pacific. India head-office of Arrow Electronics is in Bengaluru.
