DirectX 11-capable mobile graphics processors

AMD has introduced next-generation mobile graphics processors for notebooks. The Radeon HD 6000M series processors deliver highest-performing notebook graphics for those who want to experience games, entertainment and productivity on the go. Harnessing AMD's second generation of Microsoft DirectX 11-capable mobile graphics architecture, these provide users with models offering up to 1.3 teraflops of computing power for a superb gaming experience on up to six displays, stereo 3D entertainment, and improved video and application performance.

Facebook voice updates on Aircel

Now you can connect to your family and friends on Facebook in your own voice through Facebook voice updates on Aircel. What's more, for this, you don't require Internet access on your mobile phone. The service is easy-to-use: To broadcast what you're up to today, simply dial a short code to record your voice message, and post it as your status update on Facebook. Your friends will then receive an SMS alert about your new status update, to which they can reply with their own voice updates on Aircel.

User-generated caller tune service

Reliance Communications has introduced a user-generated caller tune service that allows users to record any content via 'Tune Maker' platform and set it as their own caller tune. Subscribers can also post their creations so that others can set them as their caller tunes. RCom has partnered with Hyderabad-based Altruist Technologies to create pan-India infrastructure for its new service. The facility is available online and also through an IVR interface.

WINDOWS 7 SMARTPHONE

HTC HD7 FEATURES A 10.9CM WVGA DISPLAY, 720P HD VIDEO RECORDING, 1GHZ PROCESSOR AND MUCH MORE

Bharti Airtel has introduced HTC's HD7 smartphone featuring Microsoft's new Windows Phone 7 platform. The HD7 provides an exciting set of cutting-edge features and technologies coupled with stunning looks. You can enjoy your favourite videos and

movies in cinematic-style, thanks to its large 10.9cm (4.3-inch) high-resolution screen. The inbuilt 720p HD camcorder allows you to capture videos in quality and detail.

With the HTC Hub on the HD7, you can avail a series of applications and utilities that include a weather and stocks application and a photo enhancer that enables you to apply special effects before sharing photos with friends.

COLOURFUL Eee PCs

ASUS 1015PEM AND 1215T FEATURING HIGH PERFORMANCE AND LONG BATTERY LIFE COME IN FOUR EXCITING COLOURS

ASUS has launched colourful yet powerful Eee PCs. The 1015PEM and 1215T feature ergonomic Chiclets keyboard and their large touchpads deliver a comfortable feel even after prolonged periods of use. The 1015PEM is available in marble black, marble blue and marble red colours, while the 1215T series is available in marble black, marble silver and crystal red.

The 1015PEM is powered by the latest Intel Atom N550 dual-core processor, outperforming single-core processor based netbooks by almost 23 per cent. On the other hand, the 1215T comes with the ATI Radeon HD 4250 graphics processor and SO-DIMM DDR III. Based on the AMD Nile platform, it delivers performance that exceeds that of the

CULV processors ensuring clear and crisp visuals. The HDMI output port lets you enjoy Full HD 1080p video playback on an HDTV or projector.

Battery life is up to 13 hours for the 1015PEM and almost six hours for the 1215T Eee PC.
