- Additional Features: TV-out, FM radio, photo viewing, e-book and built-in games, good-quality ear phones, various equaliser modes to enhance the music

struggling with the controls or the user interface when you should rather just be grooving.

Screen size and resolution

If listening to music is the central purpose behind buying the portable media player, screen size and resolution are not quite important. Audio-only players mostly do not require big screen. These come with a minimum of two-line text to 6cm (2.4-inch) screen for album art display. There are also models without any display.

However, watching videos requires a sizeable screen with good resolution. Video models come with a screen size above 5 cm. Players with 10.2cm (4-inch) or bigger displays are becoming the norm. Some of the newer models now even have a TV-out connection,

which means you can enjoy your favourite movies from the player on a big screen when at home.

A tiny screen is not really ideal for extended watching of videos. But you can sacrifice the screen size to some extent for the convenience of portability—provided the player at least displays clear, sharp, bright images with good colour rendition.

Connectivity

All media players come with PC connectivity for transfer of music. Some even come with Bluetooth and wireless Internet connectivity. Look for a player which can also play music purchased through the Internet. Such players are usually called MTP players. Some brands like Philips offer players which are dual-mode, i.e., you can choose to
