

Data Backup and Recovery

Made easy by tools like Redo Backup and Recovery, Bacula, Areca-Backup, 7-Zip and FreeFileSync

Redo Backup and Recovery

Redo Backup and Recovery is so simple that anyone can use it. It has most features coupled with the simple and user-friendly interface, and allows bare-metal restore. Its graphics user interface boots from the CD in less than a minute. Redo Backup

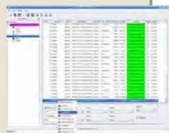

and Recovery is a live CD, so it does not matter what operating system you use (Windows or Linux). You can use the same tool to backup and restore every machine.

Bacula

Bacula is a set of Open Source, enterprise-ready computer programs that allow you to manage backup, recovery and verification of computer data across a network of computers of different kinds.

These programs work together to provide a robust, easily managed and complete backup solution. Bacula offers many advanced storage management features that make it easy to find and recover lost or damaged files.

What's EFY-CD all about?

Welcome friends! Wondering what goodies we have in the EFY CD? Allow us to reveal all! There are three to four different categories of software that we feature every month, most important of which is the 'Design and Simulation' category. It comprises various electronics software, datasheets, e-books, circuit ideas and EFY software. The CD also contains three other sections: Resources, Fun and Utility. 'Resources' contains essential software like Acrobat Reader, Enzip and a few others, which form the basic requirements of any PC. The 'Fun' segment includes computer games, whereas in 'Utilities' you will find multimedia and IDE software, Internet applications, etc.

7-Zip

7-Zip file archiver has a high compression ratio. The program supports 7z, ZIP, CAB, RAR, ARJ, LZH, CHM, GZIP, BZIP2, Z, TAR, CPIO, ISO, MSI, WIM, NSIS, RPM and DEB formats. Being a free software, it can be used on any computer without any restriction.

Areca-Backup

Areca-Backup Open Source file backup software supports incremental, image and delta backup on local drives or FTP servers. It has been designed to be as simple as possible to set up and also allow you to interact with your archives and the files they contain.

FreeFileSync

FreeFileSync is an Open Source folder comparison and synchronisation tool. It is optimised for a high performance and usability without restricted or overloaded user interfaces.
