STORAGE

Small-size solidstate drives

Transcend Information has added low-profile mSATA and half-slim solid-state drives (SSDs) to its industrial product line. The new small-footprint SSDs are designed for such applications as thin and lightweight notebooks, netbooks, tablets and mobile Internet devices.

The mSATA SSDs leverage the speed and reliability of SATA inter-

face, yet offer a smaller form factor than 6.4cm (2.5-inch) SSDs—only one twelfth their volume and one seventh the weight. These measure 29.85×50.8×3.5 mm³.

Compared to mSATA SSDs, half-slim SSD modules have bigger form factor of 54×39×4 mm³, but are still much smaller than 6.4cm SSDs—only one eighth the volume. These use the same SATA connector as used on 6.4cm hard disk drives and SSDs, which makes them ideal for such applications as industrial control systems and notebooks designed to use the 6.4cm storage form factor.

The mSATA SSDs are offered in 32GB and 64GB capacities, while the half-slim SATA SSDs are available in capacities ranging from 4 GB to 64 GB.

USB flash drive

KINGMAX has released the PD-33 USB flash drive inspired by the sports cars' streamlined design and stunning colour of the body. The automotive refinish coatings along with low-key black surface impart a sporty and smart look to the drive. The capless retractable design makes the drive easy to use.

The PD-33 comes in capacities of 2 GB to 32 GB and colours of sparkly orange and eagle gray. It is compliant with USB 2.0 standard.

LIGHTING

LED panel lights

Free yourself from uneven, fluorescent tubelighting with the Pollux light-emitting diode (LED) panel lights from GlacialLight—a sub-division of GlacialTech Inc. All of these lights

have evenly distributed 'cool-white' LEDs covering their surface for perfect, easy-on-the eyes light.

Designed to be both fashionable and functional, they are ideal for replacing traditional tubelights or grid lights.

Consuming only 50W of power while providing 3400 lumens of light, the LED light panels are bright, energy-efficient and can be used in a variety of indoor settings. From commercial and industrial to residential applications, these can be recessed or

hung, placed on ceilings or walls.

POWER

Pocket-friendly digital home UPS

Su-Kam has launched a pocket-friendly, portable and highly efficient digital home UPS with an inbuilt battery.

Called Pico, the 100VA home UPS system runs all regular appliances with ease. It can provide uninterrupted and instant power back-up for up to eight hours. The inbuilt battery features over-charging and

deep-discharge protection. The auto sleep feature minimises battery use when the appliance is not connected to the UPS system.

The UPS is priced between Rs 1538 and Rs 1990.
