SEMINAR ON ELECTRONICS MANUFACTURING CHALLENGES & BEST PRACTICES

February 19, 2011 • Pragati Maidan, New Delhi

In this era of competition, companies need to be faster, economical and better. To meet this goal, manufacturers are continually improving their production processes. Yet, they feel the pressure of keeping up with the fast paced changes.

Those heading production face numerous challenges—What are the best practices that can be applied to increase production with minimal effort? How to employ skilled person and retain them? How to improve the quality of products without increasing their cost? How to stay ahead of rest of the industry?...The list is long!

For solutions attend the seminar on Manufacturing Challenges and Best Practices. It offers a great platform to explore the best manufacturing practices being implemented by successful companies. You can thus expand your opportunities in fast growing and promising markets—in India and overseas.

Seminar Objectives

The seminar proposes to bring together eminent people from the manufacturing sector, who will share their views, ideas and first hand experiences from the Indian and global electronics industry. Their focus will be on the best practices that can resolve the manufacturing challenges being faced by the Indian manufacturers. The seminar will chart an action plan to increase production as well as raise the quality of Indian products to the level of international standards.

Key Facts

Date: February 19, 2011
Time: 9:30 am to 5:30 pm
Venue: Pragati Maidan, New Delhi
Delegate Fee: Rs 5,000
(inclusive of all taxes)

KEY TOPICS

- **Best Practices:** Quality Enhancement, Wastage Reduction
- **Best Practices:** Sourcing and Managing the Supply Chain
- **Best Practices:** Developing and Managing Manpower
- **Best Practices:** Automation
- **Best Practices:** Green Manufacturing
- Latest Technology & Equipment for Electronics Production

Key Takeaways

- Knowledge enhancement with inspiring first hand experiences from successful manufacturers
- Identifying challenges and best practices to resolve them
- Identifying new and emerging technology and innovations
- Networking with key production people from the global and domestic electronics industry

Target Audience

- People heading production
- Industrial professionals
- Manufacturers and suppliers
- Distributors
- Installers and integrators
