

PERFECT PICTURE VIDEO 5X THE CABLE REACH

Intersil's new ISL59605 MegaQ™ Adaptive Composite Video Equalizer enables transmission of high quality – perfect picture video – over 1 mile (1600 m) of unshielded twisted pair (UTP) or coaxial cable. That's over five times further than the closest competitor.

The entire MegaQ™ family of equalizers come with industry-leading advanced features including:

- Fully automatic operation
- NTSC and PAL compatibility
- Color and Monochrome equalization
- Operating mode options for enhanced image stability in noisy environments
- Automatic polarity detection and correction for simplified and error-proof installation
