AROUND-EAR HEADPHONES

ENJOY IMPROVED AUDIO PERFORMANCE WITH BOSE AE2 THAT FIT COMFORTABLY AROUND YOUR EAR

Listen to music on-the-go, at home or at work with Bose AE2 audio headphones. These headphones (which are not noise-cancelling) use an enhanced acoustic design that includes a more sophisticated application of proprietary Bose TriPort acoustic headphone structure. As a result, music sounds smoother and more natural throughout the entire frequency range—high frequencies and vocals are reproduced with improved clarity, and deep low notes are delivered more faithfully.

Ear cushions made of memory foam more effectively conform to different head shapes, and distribute weight more evenly around the ear to reduce pressure points. These better-fitting ear cushions, combined with a redesigned headband, contribute to a more comfortable fit for hours of listening.

The headphones can be used with nearly any audio source, including iPod, iPhone, iPad, MP3 player and personal computer. These feature a fold-flat earcup design and a single, detachable cable for easy storage and portability in the included carrying case.

DIGITAL CAMERAS WITH INTERCHANGEABLE LENS

SONY'S α NEX SERIES DELIVERS DSLR QUALITY IN AN ULTRA-COMPACT BODY

Sony claims its α NEX-5 and NEX-3 to be the world's smallest and lightest interchangeable-lens digital SLR cameras. The new cameras allow you to effortlessly capture stunning, DSLR-quality photos.

The background defocus function lets you defocus the background to make your main subject stand out from the scene. At 7fps shooting speed, you can capture all the fast-moving action. Record crisp HD movies with α NEX-5 at the click of a simple record button. And by sweeping the camera from one end

Price:

α NEX-5: ₹ 34,990; α NEX-3: ₹ 29,990

to the other, capture beautiful 3D panorama shots.

For photographers who are averse to extensive manual controls on a camera, the α NEX-5 and NEX-3 offer user-friendly settings, allowing them to capture professional-quality photos effortlessly.

SLIMMEST MULTITOUCH TABLET

JUST 1.15CM THICK, VIEWPAD 7 LETS YOU SURF THE INTERNET, TAKE AND SHARE PHOTOS, PLAY GAMES, LISTEN TO MUSIC AND CONNECT WITH FRIENDS

ViewSonic has launched the ViewPad 7 and ViewPad 10 tablets incorporating full mobile phone, computer and gaming capabilities. At 1.15 cm in thickness, the ViewPad 7 device is claimed to be the world's slimmest, multi-touch, all-in-one tablet.

Designed to meet the work, lifestyle and entertainment needs, the new tablets let you surf the Internet, take and share photos, play games, listen to music and connect with friends. The tablets are fully wireless-enabled, measuring 17.9x11 cm² in size (with 17.8cm screen size) and weighing 375
