Android gets Google Instant

Google Instant, the new-generation search feature of Google, has come to its mobile platform Android. This release is not limited to a specific country but for all Android devices worldwide. Prior to this release, Google Instant was only available on the Web interface of Google Search and could also be accessed from the address bar in Google Chrome browser. Google Instant for mobile is available to devices running on Android 2.2 or higher and iOS4 devices.

Skype and YouTube for Symbian 3 devices

Skype and Google have delivered updated software for the new Symbian 3 devices. Free calls and other features for Skype users and improved video functionality from YouTube are some of its benefits. Earlier, the unavailability of Skype was a disappointment to some users of Nokia N8, C7 and C6-01. Now, even Symbian 1 users can upgrade their Skype and try out the SILK codec. The YouTube app that was already available on Symbian 3 phones has been updated to 2.4.10, making it better suited for bigger screens.

Watch movies anytime, anywhere with Tata Photon TV

Now all Tata Photon Plus mobile broadband subscribers can subscribe to the ongoing and latest movies from the library of movies available on Tata Photon TV application from Tata Teleservices. Unlike traditional pay-per-view services offered by several other platforms, where the viewer needs to adhere to fixed show timings, Movies on Photon TV will allow subscribers to watch movies anytime, anywhere as per their preference. The subscription validity for each movie will be for 30 days.

Reliance Communications launches 3G services

Telecom service provider Reliance Communications has launched 3G services starting with Delhi, Mumbai, Kolkata and Chandigarh. With the 3G rollout, Reliance Communications becomes the first operator to offer 3G services to customers in the top three metros of Delhi, Mumbai and Kolkata. It will be launching 3G services across all 13 telecom circles, where it holds 3G licences, by the end of Fiscal 2010-11. The Reliance 3G network is capable of offering peak speeds up to 28 Mbps.

ANDROID-BASED MOBILE INTERNET DEVICE

TOSHIBA AC100 OFFERS UP TO SEVEN DAYS OF BATTERY LIFE IN STANDBY MODE WITH INSTANT-ON CAPABILITY

Price: ₹ 18,721

Toshiba India has introduced its first Android-platform mobile Internet device (MID). The AC100 is also the first Android device with a full-size keyboard. Its slimness

and light weight, coupled with instant-on capability, make it ideal for browsing the Internet, e-mails and social networking. NVIDIA Tegra processing technology makes the AC100 perfect for consuming heavy content.

The AC100 offers up to seven days of standby time under mixed use, with a rapid start-up time of less than a second. In constant use, it can provide up to eight hours of

battery life.

The AC100 is easy to take anywhere, thanks to its ultra-light weight of just 870 gm. Measuring just 14 mm at its thinnest point, the device is easy to fit into any bag and carry around.

HD MEDIA PLAYER

ASUS O!PLAY HD2 WITH USB 3.0 SUPPORT CAN ALSO BE CONFIGURED AS A NETWORK-ATTACHED STORAGE DEVICE

Price: ₹ 8000 (excluding taxes)

The ASUS O!Play HD2 media player with USB 3.0 supports transfer of high-definition video and audio at ultra-fast speeds. It also features standard 8.9cm (3.5-inch) hard drive compatibility, network-attached storage (NAS) support, iPhone interconnectivity and Digital Living Network Alliance compatibility for effortless access to online entertainment.

USB 3.0 works up to ten times fast-

er than USB 2.0, so even an entire HD movie takes only around 70 seconds to transfer.

The player comes preset with iTunes, Samba and standard FTP server functions. The player even works as a jukebox, with on-demand browsing of stored music files. It supports almost all the popular formats, including MPEG2 (AVI/VOB), MPEG4 (AVO/Xvid), M2TS (Blu-ray), MKV (H.264), rmvb and DVD functional navigation of ISO and IFO formats. It also supports Dolby TrueHD decoding and pass-through, taking full advantage of Blu-ray disk quality to produce lossless audio. The 7.1-channel audio output gives you theatre-like enjoyment.
