

Digital Circuits

Digital Circuits is a 27-year-old company having manufacturing facilities at Bengaluru, Mysore, Pune, Baddi (Himachal Pradesh) and Rudrapur (UT). Its Chennai facilities are under construction at Sriperumbudur. The company claims to provide total EMS including PCB assembly, wiring harness, plastic injection moulding and final box build, delivering end-to-end solutions to OEMs in the fields of defence, avionics, medical electronics, telecom, power, energy, automobiles and consumer durables. Its services include design, prototype development, global sourcing of inputs, PCB assemblies, product integration, logistics and after-sales service.

₹ 550 million

Elcoteq Electronics (India)

Elcoteq SE is a global life-cycle service partner for high-tech product and service companies. It has a proven track record in EMS and a global factory network coupled with modern manufacturing equipment and consistent system and processes.

Elcoteq's Bengaluru facility became operational in the year 2005. It manufactures consumer electronics and system solution products, such as mobile phones, wireless phones, their parts and accessories, LED lighting products, set-top boxes, flat-panel TVs, infrastructure systems, modules and other industrial segment products.

A special focus lies on complex infrastructure equipment such as radio units for base stations, lighting products, filter units, box build of WiMAX products and power supplies with low to high volumes.

Turnover (Jan.-Dec. 2009):
92.5 million euros

EOS Power India (formerly Celetronix Power India)

EOS Power India specialises in design, manufacture, marketing and support of high-density, high-efficiency, low- to medium-power AC/DC switching power supplies ranging from 20 watts to 300 watts. The company employs 500 directs and indirects at design and manufacturing site in Mumbai, and global sales locations in the US and Europe. It makes approximately 500 standard product SKUs consisting of both open-frame power supplies fitted inside OEM electronics products as well as external adaptors. It also makes modified standard and custom products for select customers. Design and manufacturing activities are conducted at the company's facility located in Mumbai. The company produces and sells approximately 400,000 power supplies per year from this facility and exports them to customers primarily located in North America, middle east in Europe (EUME) and Asia (Hong Kong and Singapore).
