

Circuits and Project Ideas

Internet is a good learning resource for the engineers, hobbyists and inventors. We present a few popular sites where you can find electronic circuits or schematics. Try out, there might be a circuit here that you are looking for

DiscoverCircuits

The site is a one-stop resource for engineers, hobbyists, inventors and consultants. It is a collection of information and offers quick solutions to electronic design problems. It was launched in 2002 and currently has 30,000+ electronic circuits or schematics carefully cross-referenced into 500+ categories. The site is owned by David A. Johnson, P.E. who is an electronics engineer with over 30 years of practical experience in the areas of analogue and digital design, fiber optics and RFID.

Electronics For You

This portal serves as a storehouse of information for the electronics and technology industry. The latest news, information about new products, and a Web search covering more than 50,000 electronics websites are some of the facilities this portal offers. It also includes the hugely popular EFY-tested circuits, reproduced from Electronics For You magazine.

Extreme Circuits

The website is a good resource having tons of free electronics projects, circuit diagrams, circuit schematics, do-it-yourself and hobby projects. The circuit diagrams included on the website have been divided into different categories, which makes accessing and searching easy. It also has a link where you can view the complete list of the circuits at a single go.

Electronics Project Design

The site has a collection of different projects and circuits to experiment. It also includes articles on the importance of reliability testing, electromagnetic compatibility (EMC) testing, failure mode effect and analysis, fundamentals of electronic parts and test/measurement tools that are needed before you embark on your journey to build your own electronics project.

Electronics Lab

This site is a good resource on the Internet for electronics hobbyists. Here you can find interesting electronic schematics and projects provided by visitors. There are also links to projects in the blog section. The search option provided on the home-page is a good tool to browse the site as per your requirement.
