Semiconductor industry report: Asia leads the way

The global semiconductor market grew 96 per cent since 2001 and is expected to continue to grow at an annual growth rate of 8 per cent, according to the World Semiconductor Trade Statistics.

The growth is driven by increased commercial requirements, sustained by consumer demand for more bandwidth and communicative applications, which have created a strong market influence within communication. The introduction and exponential popularity of Skype, Facebook and LinkedIn has increased the demand for Internet bandwidth.

PC unit growth in 2011 will slow to 9.3 per cent

Worldwide PC unit growth is projected to be slightly weaker in 2011 than the previous projection, according to Gartner, Inc.'s latest forecast. PC shipments are expected to grow 9.3 per cent in 2011, reaching 385 million units. This is slightly lower than Gartner's previous projection of 10.5 per cent growth for this year.

"Consumer mobile PCs are no longer driving growth, because of sharply declining consumer interest in mini-notebooks. Mini-notebook shipments have noticeably contracted over the last several quarters, and this has substantially reduced overall mobile PC unit growth," said Ranjit Atwal, research director at Gartner.

Solar PVs set to challenge fossil fuels

Within the next ten years, solar photovoltaic (PV) systems have the potential to be the most economical form of generating electricity, even compared to traditional fossil fuels, according to IEEE's report.

MMD appoints national sales head and marketing manager

MMD, the brand licence holder for Philips Monitors, has appointed Kuldeep Ramaiya as the national sales head, MMD India, and Tapasya Ohri Gupta as manager, marketing for India operations. This move will help MMD to build channel partnerships across existing and new geographies and grow its business through providing products and services to existing and prospective customers.

Sony Ericsson appoints new MD

Sony Ericsson has appointed P. Balaji as the managing director of the company's India operations, effective from July 1, 2011.

In this role, Mr Balaji will help in establishing Sony Ericsson's leadership position in the Android market and work closely with operators and

distributors in India.

Poornima Shenoy quits ISA

Poornima Shenoy has quit India Semiconductor Association (ISA) to launch her own venture.

Now, Shenoy's venture will focus on skill development and address some of the needs of the National Skill Development Corporation (NSDC).

Compuware India gets new MD

Compuware has appointed Neeraj Dotel as managing director for its India operations. Dotel will be responsible for building the Compuware India team and incubating its business in the fast-growing Indian market. As the managing director for India, he will also be a part of the core team responsible for creating strategies for emerging markets.

"No other alternative source has the same potential," said James Prendergast, senior member and executive director, IEEE.

According to the International Energy Association (IEA), global solar PV capacity has been increasing at an average annual growth rate of more than 40 per cent since 2000. By 2050, it is expected that solar PV will provide 11 per cent of global electricity production, corresponding to 3000 gigawatts of cumulative installed capacity.

Embedded systems market in India to triple in size by 2015

National Association of Software and Services Companies (NASSCOM) and Zinnov Management Consulting have released their joint study report—Embedded Systems Opportunity: Powering Indian IT up the Value Chain.

According to the report, the total addressable embedded system R&D global opportunity is expected to reach

\$89 billion by 2015.

"The embedded systems market in India has the potential to triple in size to about \$14.4 billion in 2015 from \$4.95 billion in 2009," said Pari Natarajan, CEO, Zinnov Management Consulting.

The study points out that currently, India's revenue from embedded systems development is almost \$5 billion, employing about 110,000 professionals.
