India invites EoI for semiconductor units

The government of India has invited preliminary expression of interest (EoI) from technology companies and investors to set up semiconductor fabrication units to kick-start chip manufacturing in the country. This is India's second attempt at attracting large investments in semiconductor fabs or wafer fabrication plants to meet fast-growing demand in the electronics sector.

The idea is to find out which companies are interested and what measures will make such investments viable.

MoEF lays out e-waste rules

Ministry of Environment and Forests (MoEF) has enacted the e-waste (Management and Handling) Rules, 2011, which will come into effect from May 1, 2012. These rules cover the restriction of hazardous materials in electronics and electrical equipment, as well as impose responsibilities on producers, collection centres, consumers or bulk consumers, dismantlers and recyclers.

ELCINA Electronic Industries Association of India participated actively in providing inputs for these rules, specially for inclusion of the final rule (chapter V 13-1) for restriction on the use of hazardous substances, and for ensuring relevant threshold limits for five substances—lead, mercury, hexavalent chromium, polybrominated biphenyls or polybrominated biphenyls ethers—which are similar to the EU Legislation.

Moser Baer's solar PV modules to enhance solar projects bankability

Moser Baer Solar Limited's (MBSL) photovoltaic (PV) modules have been certified as being resistant to 'salt mist' corrosion, thus enhancing the overall reliability of these modules, leading to better bankability of solar projects
