

Switching the smart way

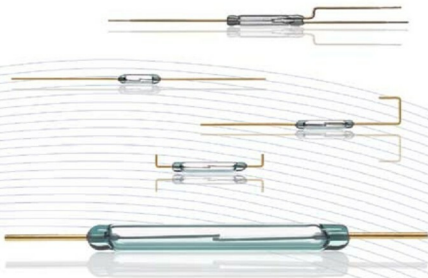

PIC Reed Switches – the ideal components for non-touch switching in nearly any application.

- › Cost-efficient, handling loads from zero load up to 250 Watts
- › Smallest size for applications in hearing aids and implantable medical devices
- › Highest reliability and long life for demanding applications in automotive or white goods industry

Reed Switches

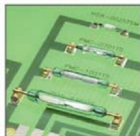

Benefits

- › No power supply required
- › Switching voltage up to 10 kV
- › Carry current up to 5 A
- › Normally open, change over, close differential, mains voltage, latching and many special types available
- › Power switches and switches for high frequency circuits available
- › Various sensitivity ranges

SMD Reed Switches

PIC SMD Reed Switches – most comprehensive range with more than 20 models and three contact forms to choose from. Your most economic choice for automated assembly!
