

commissioned using the same.

"In India, bankers and financial institutions are looking at various elements that ensure higher reliability of the solar projects. Hence, need of the hour for states like Gujarat and Tamil Nadu, which have very high salt content in the air, is PV modules that are designed to withstand the salt and acidic element in the air or soil," Vivek Chaturvedi, senior vice president, MBSL.

Huawei setting up R&D Campus In Bengaluru

Chinese telecom equipment manufacturer Huawei Technologies is set to invest \$120-\$150 million to establish its own R&D unit in Bengaluru. The research facility would take up entire design of the phones, the software that gets inside and end-to-end testing of the products for the Indian market.

Huawei has reportedly bought about 20 acres in Whitefield, Bengaluru and has also got no objection certificates (NOCs) from several government departments. The campus, with one million sq.ft of built-up area, would house 3500-4000 people.

Schneider Electric acquires 74 per cent Luminous' shares

Schneider Electric has acquired 74 per cent of Luminous' shares for Rs 14 billion. The combination with Luminous is expected to broaden the product portfolio of Schneider Electric, balance its geographical exposure in India and provide access to the diffused distribution network.

"This acquisition will further strengthen our position in India, attain critical size in the fast growing Indian inverter market and further

RS launches LeCroy's oscilloscopes In India

LeCroy has tied up with RS Components and appointed the latter as the distributor of LeCroy's test and measurement equipment in India.

LeCroy has a multi-distribution channel and "RS Components is one of the most important ones," says Rajendran T, application manager, India and SE Asia. "Employees at RS Components have been given training by LeCroy and will be able to provide technical support for the oscilloscopes," he added.

Emerson Network Power appoints Accel Frontline Services as India warranty service provider for small UPS

Emerson Network Power has appointed Accel Frontline Services Limited as its strategic warranty and return material authorisation (RMA) service provider in India for its small and home office range of UPS.

As a part of the alliance, Accel Frontline will oversee on-site warranty service support for Emerson's range of UPS up to 3 kVA for both channel and enterprise customers based in India.

Matrix Comsec inaugurates R&D centre in Vadodara

Matrix Comsec has launched its new research and development (R&D) centre in Vadodara.

The R&D centre will house more than 500 design and development engineers and will be the nucleus of the company's activities to connect its design, development and manufacturing activities with its global sales and marketing operations.

Morningstar's TriStar MPPT gets IEC62093 certification

Morningstar's TriStar maximum power point tracking (MPPT) solar controller has received IEC62093 certification, and is now suitable for large, off-grid photovoltaic systems including remote telecommunications, security and monitoring, rail-road signalisation, schools, hospitals and homes.

consolidate the global leadership in its IT business," said Laurent Vernerey, executive vice president, Schneider Electric's IT business.

element14 partners with LeCroy

element14 has partnered with LeCroy to provide a full suite of performance analysis solutions for customers and electronic design engineers in Asia-Pacific.

"We recognise that Asia-Pacific has a huge market for high performance oscilloscopes, and we are thrilled at the possibilities of how we can step-up

and meet these demands as well as engage new segments of this vast market through our partnership with element14," said Conrad Fernandes, vice president of sales, LeCroy, Asia Pacific.

Digi-Key Corporation and Lattice Semiconductor sign global distribution agreement

Digi-Key Corporation and Lattice Semiconductor have signed a global distribution agreement. Under the terms of this global distribution agreement, Digi-Key is authorised to sell Lattice's complete portfolio of innovative, low-power, low-cost FPGA, PLD and programmable power management design products.

"Lattice will enable us to provide our world wide customer base with a full range of FPGA and PLD solutions," said Mark Zack, vice president, Digi-Key's semiconductor product.
